

Properties of Matter

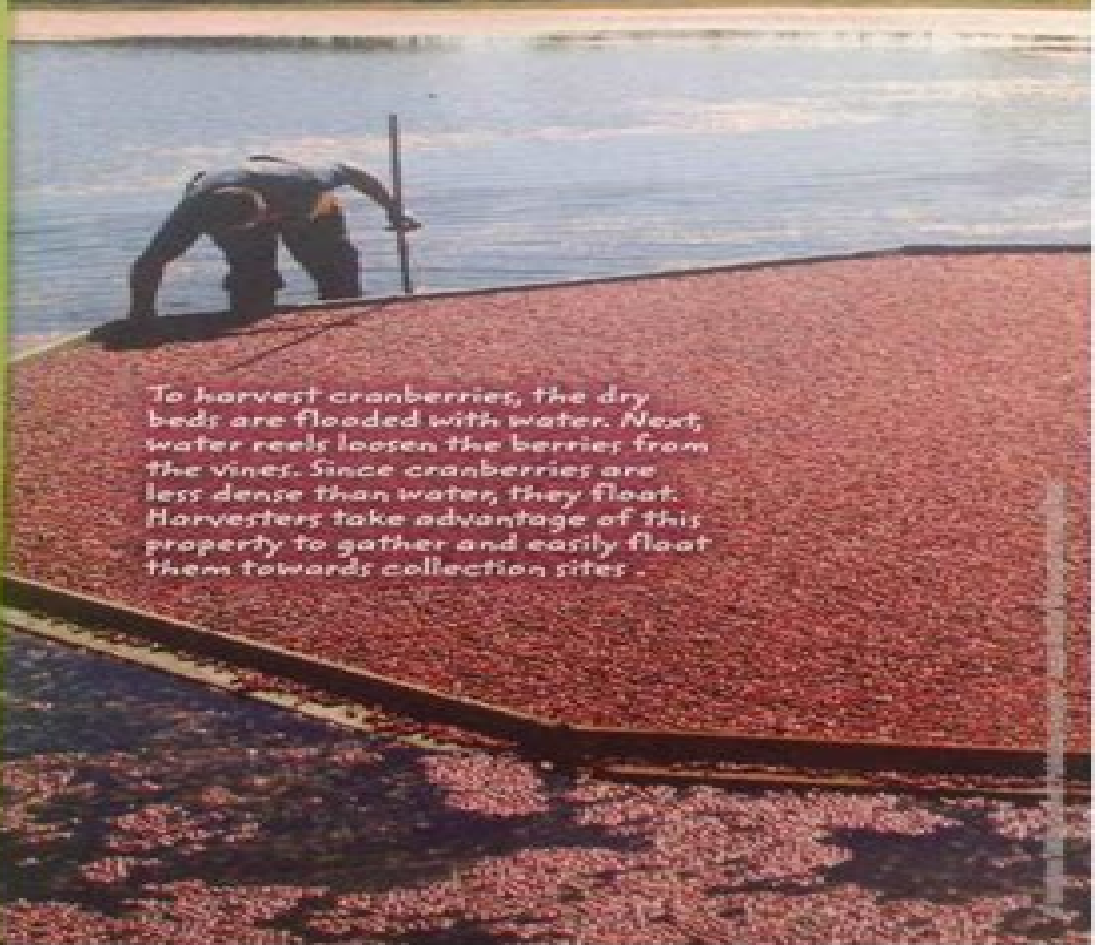

ESSENTIAL QUESTION

What are physical and chemical properties of matter?

By the end of this lesson, you should be able to classify and compare substances based on their physical and chemical properties.

Indiana Standards

8.1.6 Explain that elements and compounds have characteristic properties such as density, boiling points and melting points, that remain unchanged regardless of sample size.

A photograph showing a person in a flooded cranberry field. The person is bent over, using a long pole to harvest the berries. The water is a deep red color, and the background shows a line of trees under a clear sky.

To harvest cranberries, the dry beds are flooded with water. Next, water reels loosen the berries from the vines. Since cranberries are less dense than water, they float. Harvesters take advantage of this property to gather and easily float them towards collection sites.
