Buchmeiser,2005-02-18      The United States Catalog Mary Burnham,Carol Hurd,1928      Antioxidants and Functional Components in Aquatic Foods Hordur G. Kristinsson,2014-04-15 Antioxidants and Functional Components in Aquatic Foods compiles for the first time the past and present research done on pro and antioxidants in aquatic animals The book addresses an area of extreme importance for aquatic foods since lipid oxidation leads to such a large number of quality problems Many

of these problems are also seen in other muscle based foods but are exaggerated in aquatic foods so the book's contents will be of great use and interest to other fields. Written by top researchers in the field, the book offers not only general overviews of lipid oxidation in aquatic foods and aquatic food pro and antioxidant systems but also covers specifics and gives the latest information on the key pro and anti oxidants derived from aquatic foods as well as some of the most recent and innovative means to control lipid oxidations in aquatic foods and food systems with fish oils. Coverage includes the latest research on the effects aquatic foods have on oxidative stress in the human body, an area of great interest recently. Additionally, a chapter is devoted to the latest techniques to measure antioxidative potential of aquatic foods, an area still in development and one very important to the antioxidant research community. Antioxidants and Functional Components in Aquatic Foods will be of great interest to the food science, medical, biochemical, and pharmaceutical fields for professionals who deal with aquatic food products, muscle foods, products, beef, pork, poultry, etc., lipid oxidation, and pro oxidant and antioxidant systems.

**Functional Properties of Food Components** Yes Hajahu Pomeranz, 2012-12-02. An extensive revision of the 1985 first edition, this volume combines the biochemistry and functionality of all food components. It provides broad coverage and specific descriptions of selected major foods as well as such elements as biotechnology, engineered foods, and food patents. While directed toward food technologists and nutritionists, the contents are also invaluable to biologists, engineers, and economists in agriculture, food production, and food processing. Updates the first edition by the addition of genetic engineering progress. Contains previously unpublished information on food patents. Includes oriental and other ethnic foods, dietetic foods, and biotechnology generated foods. Features additional material on poultry and fish.
