IBM SPSS for Introductory Statistics George A. Morgan, Karen C. Barrett, Nancy L. Leech, Gene W. Gloeckner, 2019-07-15
IBM SPSS for Introductory Statistics is designed to help students learn how to analyze and interpret research. In easy to understand language, the authors show readers how to choose the appropriate statistic based on the design and to interpret outputs appropriately. There is such a wide variety of options and statistics in SPSS that knowing which ones to use and how to interpret the outputs can be difficult. This book assists students with these challenges. Comprehensive and user friendly, the book prepares readers for each step in the research process: design, entering and checking data, testing assumptions, assessing reliability and validity, computing descriptive and inferential parametric and nonparametric statistics, and writing about results. Dialog windows and SPSS syntax along with the output are provided. Several realistic data sets available online are used to solve the chapter problems. This new edition includes updated screenshots and instructions for IBM SPSS 25 as well as updated pedagogy such as callout boxes for each chapter indicating crucial elements of APA style and referencing outputs. IBM SPSS for Introductory Statistics is an invaluable supplemental or lab text book for students. In addition, this book and its companion IBM SPSS for Intermediate Statistics are useful as guides/reminders to faculty and professionals regarding the specific steps to take to use SPSS and/or how to use and interpret parts of SPSS with which they are unfamiliar.

This book investigates the way that corporations are strategically shaping children to be hyper-consumers as well as the submissive employees and uncritical citizens of the future. Sharon Beder shows how marketers and advertisers are targeting ever younger children in a relentless campaign transforming children's play into a commercial opportunity and taking advantage of childish anxieties. She presents an alarming picture of how a child's social development through education, health care, and nutrition has become an ordered conveyor belt of consumerist conditioning. Focusing on education in particular, she also shows how difficult children are taught from an early age that pharmaceuticals can be used to discipline them or to make them happy. **Resources in Education**, 1999 **Working Mother**, 2002-10.
