

Name _____ Period _____

Chapter 3: The Molecules of Life

Guided Reading Activities

Chapter Content: Organic Compounds

Complete the following questions as you read the third chapter content—Organic Compounds:

1. The element carbon is essential to an organic compound.
2. Is this molecule an organic compound? Briefly explain your answer.

Yes, it is an organic compound because of the carbon and hydrogen present in the molecule

3. The oxygen atom in ethyl alcohol (the molecule pictured above) forms a polar covalent bond with the hydrogen atom. This causes the hydroxyl functional group ($-\text{OH}$) to have polarity (it is polar). Based on this, would you expect ethyl alcohol to readily interact with water? Briefly explain your answer. *Hint—Think back to the end of chapter two.*
Ethanol readily interacts with water because the hydroxyl group imparts polarity to the ethanol, which allows it to be attracted to water.
4. Complete the following diagram using the following terms: dehydration reaction and hydrolysis.
