and that new analytical tools need to be developed to better understand the phenomenon The traditional approach based on Western states is insufficient and has become increasingly irrelevant in a transformed global environment Instead of drawing from a single theory of international relations the contributors have chosen to build upon a wide range of theories in a deliberate demonstration of analytic eclecticism A pluralistic approach provides stronger explanations while remaining analytically and intellectually rigorous Many of the theory contributions are reconsidering how the largely Western bases of such theorising need revising in light of the emerging middle powers many of which are in Asia Presenting a strong argument for studying middle powers this book explores both the theory and empirical applications of the concept by rethinking the definition and characteristics of middle powers using a range of case studies It examines changes in the study of middle powers over the last decade proposing to look at the concept of middle powers in a coherent and inclusive manner Finally it aims to further the discussion on the evolution of the international system and provides sound conclusions about the theoretical usefulness and empirical evolution of middle powers today

Literacy, Storytelling and Bilingualism in Asian Classrooms Alice Honig, 2017-10-02 Contrary to previously held beliefs that bilingualism would hinder cognitive and language development in children research has shown that bilingual children show enhanced cognitive flexibility and an ability to better focus their attention This book explores both emergent literacy and bilingualism in children in four Asian countries Hong Kong Singapore Myanmar and Taiwan giving specific examples of how adults including parents teachers and other education professionals can use creative interaction as opposed to rote learning to increase children's interest in learning English as a second language This is especially important in the increasingly computer connected world where innovation can be key in making second language learning both interesting and effective Specific contributions to this volume include a case study of Taiwanese families analyzing home videos of their children's responses to the task of reading a Mandarin picture book of vocabulary instruction in Hong Kong which requires children to gain triple language proficiency Cantonese English and Mandarin of the relation between Cantonese proficiency amongst 5 year olds in Hong Kong and their receptiveness to learning new English vocabulary of the relation between English reading ability and Mandarin speaking ability amongst Singaporean children of the importance of teachers sensitivity to gender differences among 6 year olds in Singapore learning English as a second language of the active promotion of storytelling by teachers in Myanmar in order to develop children's interest in story structure and to stimulate early language skills and of an emphasis on family based emergent literacy activities for children in Taiwan This book was originally published as a special issue of *Early Child Development and Care*

Publishers' Circular and Booksellers' Record of British and Foreign Literature, 1881 Political Libels Ian Loveland, 2000-06-08 The political libel is as old as politics itself The politician seeking redress in the courts for an allegedly libellous publication uses the English law of libel to attempt to remove the stain from his character Wielding the sword of truth he does battle with the media often with huge attendant publicity and at great risk to his reputation should he

fail in his quest At the same time he stands to pocket a substantial sum in damages if he can show the libel to have been committed In this the first modern study of the phenomenon of political libels the author delves behind the headlines and looks at the political and legal problems which surround this little understood but controversial area of English law In this highly readable and engaging work the author surveys the ancient and modern history of the political libel laws and argues that the English law of libel has in the main been too jealous of defending the reputations of politicians and insufficiently alert to the legitimate interest of the public A strong case is made for reforming the law substantially a case which rests both on the experience of other countries notably the USA and also on a re examination of a handful of English cases dating from the mid to late nineteenth century whose significance has been downplayed by lawyers in subsequent years
