**Commercialising Public Schooling** Anna Hogan, 2025-05-09 This book delves into the pervasive commercialisation of public schooling tracing its roots and examining its current manifestations From the evolution of textbook publishing to the digital transformation led by global edu businesses it sheds light on how commercial interests have reshaped education policy curriculum design and teaching practices worldwide Through a series of in depth case studies this book explores the intensification of commercial influences in schools It examines the historical rise of education corporatisation the integration of commercial curriculum resources in classrooms and the ethical dilemmas posed by public school sponsorship The work also analyses teachers agency in navigating prescriptive curriculum materials the impacts of EdTech during the pandemic and addresses how public schools themselves have become market players branding and monetising their operations Drawing on Australian and international contexts this book highlights the complex interplay between commercialisation teacher professionalism and equitable education access A must read for educators policymakers and researchers this book provides insights into the implications of school commercialisation It offers practical strategies to navigate this landscape while advocating for reforms that prioritise educational integrity over profit ensuring that public schools remain spaces of equitable and holistic learning

**Education plc** Stephen J. Ball, 2007-03-06 Is the privatisation of state education defensible Did the public sector ever provide a fair education for all learners In *Education plc* Stephen Ball provides a comprehensive analytic and empirical account of the privatisation of education He questions the kind of future we want for education and what role privatisation and the private sector may have in that future Using policy sociology to describe and critically analyse changes in policy policy technologies and policy regimes he looks at the ethical and democratic impacts of these changes and raises the following questions Is there a legitimacy for privatisation based on the

convergence of interests between business and the third way state Is the extent and value of private participation in public education misunderstood How is the selling of private company services linked to the remodelling of schools Why have the technical and political issues of privatisation been considered but ethical issues almost totally neglected What is happening here beyond mere technical changes in the form of public service delivery Is education policy being spoken by new voices Drawing upon extensive documentary research and interviews with senior executives from the leading education services industry companies the author challenges preconceptions about privatisation He concludes that blanket defence of the public sector as it was over and against the inroads of privatisation is untenable and that there is no going back to a past in which the public sector as a whole worked well and worked fairly in the interests of all learners because there was no such past This book breaks new ground and builds on Stephen Ball s previous work on education policy It should appeal to those researching and studying in the fields of social policy policy analysis sociology of education education research and social economics

*The administration of examinations for 15-19 year olds in England* Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate
