Development of Novel Stability Indicating Methods Using Liquid Chromatography Mukesh Maithani, Parveen Bansal, 2019-08-07. Reversed phase high performance liquid chromatography (RP-HPLC) has become the most widely used method for pharmaceutical analysis as it ensures accuracy, specificity, and reproducibility for the quantification of drugs while avoiding interference from any of the excipients that are normally present in pharmaceutical dosage forms. This book presents a simple methodology for developing stability indicating methods and offers a how-to guide to creating novel stability indicating methods using liquid chromatography. It provides the detailed information needed to devise a stability indicating method for drug substances and drug products that comply with international regulatory guidelines. As such, it is a must-read for anyone engaged in analytical and bioanalytical chemistry: professionals at reference test and control laboratories, students and academics at research laboratories, and scientists working for chemical, pharmaceutical, and biotechnology companies.
