Pearson Human Geography 8 Dennis DesRivieres,2008 **Pearson Human Geography 8** Colin M. Bain,Dennis DesRivieres,Karen Hume,Rick Chambers,2008 *The Geography of the World Economy 5th Edition* Paul Knox,John Agnew,Linda McCarthy,2014-04-04 The Geography of the World Economy provides an in depth and stimulating introduction to the globalization of the world economy The book offers a consideration of local regional national and global economic development over the long historical term The theory and practice of economic and political geography provide a basis for understanding the interactions within and among the developed and developing countries of the world Illustrated in colour throughout this new edition has been completely reworked and updated to take account of the substantial changes in the world economy and includes a new chapter on services It is ideal for upper level university undergraduates and for post graduates in a variety of specializations including geography economics political science international relations and global studies *Business and Society* Doctor Kean Birch,Mark Peacock,Richard Wellen,Caroline Hossein,Sonya Scott,Alberto Salazar,2017-01-15 Corporations dominate our societies They employ us sell to us and influence how we think and who we vote for while their economic interests dictate local national and global agendas Written in clear and accessible terms this much needed textbook provides critical perspectives on all aspects of the relationship between business and society from an historical analysis of the spread of capitalism as the foundation of the corporate revolution in the late nineteenth century to the regulation ethics and exclusionary implications of business in contemporary society Furthermore it examines how corporate power and capitalism might be resisted outlining a range of alternatives from the social economy through to new forms of open access or commons ownership *Social Work and the Environment* Michael Kim Zapf,2009 This ground breaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession *Geographies of Globalization* Warwick E.
