Civilization Prof. Dr. Andrew Targowski, 2016 The aim of this book is to synthesize the role of information throughout the history of civilization s development This will be defined through the convergence of a the cumulative evolution and revolution of the intellect cognition as data information concepts knowledge and wisdom b labor and c politics which seek to control the environment society and the world applying culture and infrastructure as tools Whereas researchers reveal the myriad of dimensions of the social order and its historiography this book provides a synthesis of the relations which is limited to information and its informing systems and civilization within the context of historiosophie history with judgment The method presented in this book the architectural approach to the dynamics of civilizational development is a new layer over the quantitative history based on statistical data In an architectural synthesis of civilization we seek a big picture of civilization waves in order to develop some criteria oriented views of the world and its future predictability To understand the crises and conflicts of civilization which are driven by technology in recent centuries such a synthesis as well as optimism for human proactive adaptation survival and development must be undertaken This approach to civilizational development should allow humans to eventually reinvent the future in a continuous manner We in due course should be able to predict the rate of change and provide civilization bridging solutions based on original thinking It is important to remind ourselves that information is as old as our world about 15 billion years because plants and trees and in general non human nature produces all sorts of information for example the changing colors of plants and trees which is associated with the different seasons When the first living organisms appeared on our planet they had ability to inform as well by changing forms colors signals and so on The first signs of life on our planet came into being about 3 85 billion years ago Therefore organism based life on the Earth actually came to be over a period of just 130 million years Hominids diverged from apes some 10 6 million years ago instinct driven info communication i e behavior less controlled by cognition and the first humans bipeds with large brains who could use tools and sound driven info communication took form around 6 2 5 million years ago in Southeast Africa Homo

symbolicus who could skillfully use language appeared about 60 000 years ago The origin of civilization some 6 000 years ago marks the beginning of the first advanced info communication systems applied by humans who could even record information

Africa , History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C.

Sneider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions especially in the realms of culture and economy Still the region cannot escape from the burden of history This book examines the formation of historical memory in four Northeast Asian societies China Japan South Korea and Taiwan and the United States focusing on the period from the beginning of the Sino Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951 The contributors analyse the recent efforts of Korean Japanese and Chinese scholars to write a common history of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements In doing so they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided and often conflicting historical memories The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives Through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region This book will be essential reading for students and scholars of Asian history Asian education and international relations in East Asia
