Saving Cinco Breed Rescue In Action:

Saving Cinco Howard Schultheis, 2014-11-06 This book is a narrative that I wrote as a rescue progressed At one point I was about to hit delete and get rid of the whole thing It was about to end that badly Then I realized that it was not about the results but rather the process of rescue that I was trying to write about I decided it would end where it would end for better or worse My hope was only that it would end well

Wild Rescues Raina Mooncrest, AI, 2025-03-05 *Wild Rescues* explores the vital role animal rescue plays in global conservation efforts highlighting how individual acts of dedication can significantly impact species endangerment and habitat preservation The book emphasizes that wildlife rescue is not just a compassionate act but a critical scientific endeavor For example rescuing orphaned elephants allows them to return to their natural ecosystems contributing to biodiversity and ecosystem health The book examines the escalating rates of species extinction and habitat loss due to human activities such as deforestation and pollution and explores how advances in veterinary medicine and conservation biology have shaped rescue techniques By showcasing real world case studies from stranded whales to endangered species brought back through breeding programs *Wild Rescues* illustrates the challenges rescuers face and the innovative solutions they employ The narrative progresses from introducing core principles and ethical considerations to detailed case studies and ultimately advocates for improved conservation policies Including evidence based accounts and personal interviews this book connects biology environmental science and ethics to demonstrate the multifaceted nature of conservation challenges and solutions making it valuable for anyone interested in nature biology and conservation

Manifestly Haraway Donna J. Haraway, 2016-04-01 Electrifying provocative and controversial when first published thirty years ago Donna Haraway's *Cyborg Manifesto* is even more relevant today when the divisions that she so eloquently challenges of human and machine but also of gender class race ethnicity sexuality and location are increasingly complex The subsequent *Companion Species Manifesto* which further questions the human nonhuman disjunction is no less urgently needed in our time of environmental crisis and profound polarization *Manifestly Haraway* brings together these momentous manifestos to expose the continuity and ramifying force of Haraway's thought whose significance emerges with engaging immediacy in a sustained conversation between the author and her long term friend and colleague Cary Wolfe Reading cyborgs and companion species through and with each other Haraway and Wolfe join in a wide ranging exchange on the history and meaning of the manifestos in the context of biopolitics feminism Marxism human nonhuman relationships making kin literary tropes material semiotics the negative way of knowing secular Catholicism and more The conversation ends by revealing the early stages of Haraway's *Chthulucene Manifesto* in tension with the teleologies of the doleful Anthropocene and the exterminationist Capitalocene Deeply dedicated to a diverse and robust earthly flourishing *Manifestly Haraway* promises to reignite needed discussion in and out of the academy about biologies technologies histories and still possible futures

Why Does My Dog Act That Way? Stanley Coren, 2007-12-04 Draws on recent scientific discoveries to

analyze canine character in a reference that explains how to assess a dog's specific traits and promote desirable behavior

The New York Times Index, 1924 New Challenges and Perspectives in Conservation Breeding Programs Eliana Pintus, José Luis Ros-Santaella, William Holt, Pierre Comizzoli, 2025-05-21 Conservation Breeding Programs CBPs remain essential tools to preserve animal biodiversity and save threatened species from extinction. Despite the advances made during the last decades CBPs have been carried out only on a small number of species, mostly mammals and birds. There is therefore an urgent need to develop and complement in situ and ex situ strategies to also preserve other vertebrates like fish, amphibians and reptiles in which the biodiversity loss because of climate change or other anthropogenic activities is even more dramatic. One of the main factors that limits CBPs success is the lack of knowledge of the animal reproductive biology and behavior which is precisely known for instance in less than 4% of mammals, the majority of which are terrestrial species. Such knowledge is beneficial not only to enhance but also to control animal fertility that is especially warranted for the management of overabundant or invasive species which represent a further major threat for biodiversity. The goal of this Research Topic is to bring together studies that deal with different aspects of animal reproduction both in captive and wild populations. This includes both ex situ and in situ approaches such as the management of animal reproduction in captive populations and their reintroduction release into the wild. Other approaches such as assisted reproductive technologies and biobanking greatly contribute to the success of conservation breeding. This Research Topic also welcomes studies exploring the effects of biotic e.g. inbreeding, diseases, stress and abiotic e.g. anthropogenic activities, housing and veterinary care factors on reproductive biology of all vertebrates classes with a special interest to fish, amphibians and reptiles. As a comprehensive knowledge of animal reproduction and behavior plays a key role for the development and success of breeding programs, descriptive studies on reproductive anatomy and physiology of wild or captive species, either endangered or overabundant, are welcomed. The Research Topic also accepts manuscripts that deal with ethical aspects of animal welfare in CBPs and population management of invasive or overabundant species. Amphibian conservation action plan : proceedings IUCN/SSC Amphibian Conservation Summit 2005, 2007 **Air Corps News Letter**, 1960 *Dog Heroes* Ben Holt, 2009-08-01 Swansea Jack the Labrador who saved more than 25 people from drowning, Maya the pit bull who defended her owner from a brutal attack, Max the police German shepherd who chased and caught two convicted criminals, Connie the Newfoundland who cares for her disabled owner. These are just a few of the incredible canine characters whose true stories are recounted in this inspiring collection of dog tales. Hounds from all walks of life are united within these pages in the search for the world's most devoted dogs. Heart-melting, dramatic and often deeply moving, *Dog Heroes* champions the often underestimated role of man's best friend and gives a unique insight into the lives of both working dogs and personal companions. Each loyal dog has its own story to tell and each owner or handler has individual reasons for loving them, but these dogs have one thing in common: they are all truly dog heroes.
