### **Sba Life Science Practical:**

*Biomedical Visualisation* Ourania Varsou, Paul M. Rea, Michelle Welsh, 2022-12-16 This book focuses on the challenges to biomedical education posed by the lockdowns and restrictions to on campus teaching brought about by the COVID 19 pandemic and highlights the tools and digital visualization technologies that have been successfully developed and used for remote teaching. Biomedical education for science, medical, dental and allied health professionals relies on teaching visual and tactile knowledge using practice based approaches. This has been delivered for decades via on campus lectures, workshops and laboratories teaching practical skills as well as fundamental knowledge and understanding. However, the arrival of the COVID 19 pandemic meant that education across the globe had to pivot very quickly to be able to deliver these skills and knowledge in a predominantly online environment. This brought with it many challenges as Higher Education staff had to adapt to deliver these visual subjects remotely. This book addresses the challenges and solutions faced by Higher Education staff in teaching visual content in distance education. Chapters include literature reviews, original research and pedagogical reflections for a wide range of biomedical subjects, degrees such as medicine, dentistry and veterinary sciences with examples from undergraduate and postgraduate settings. The goal of the book is to provide a compendium of expertise based on evidence gathered during the COVID 19 pandemic as well as reflections on the challenges and lessons learned from this dramatic shift in teaching. It also presents new examples of best practices that have emerged from this experience to ensure that they are not lost as we return to on campus learning in a new era of biomedical teaching. This book will be of interest to anyone looking for a helpful reference point when designing online or blended teaching for visual practice based subjects.

*Science Education in the 21st Century* Tang Wee Teo, Aik-Ling Tan, Yann Shiou Ong, 2020-06-29 This book reflects on science education in the first 20 years of the 21st century in order to promote academic dialogue on science education from various standpoints and highlights emergent new issues such as education in science education research. It also defines new research agendas that should be moved forward and inform new trajectories through the rest of the century. Featuring 21 thematically grouped chapters, it includes award winning papers and other significant papers that address the theme of the 2018 International Science Education Conference.

*The World of Science Education*, 2010-01-01 Each volume in the 7 volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, Arab States and Sub Saharan Africa. The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program. The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been

done and accomplished what is missing and what might be done next
