*Profit Beyond Measure* H. Johnson, Anders Bröms, 2011-01-25 Waste has plagued almost every industrial age firm for the past century In this powerfully argued alternative to conventional cost management thinking experts H Thomas Johnson and Anders Bröms assert that any company can avoid the waste that is generated through excessive operating costs in the short run and excessive losses from market instability in the long run To gain more secure levels of profitability management must simply change how it thinks about work and how it organizes work *Profit Beyond Measure* details how two extremely profitable manufacturers Toyota and the Swedish truck maker Scania have rejected the traditional mechanistic mindset of managing by results that generates waste Johnson and Bröms explain how Toyota and Scania achieve their legendary cost advantage through a revolutionary concept they call managing by means MBM Instead of being driven to meet preconceived accounting targets the production systems of Toyota and Scania are governed by the three precepts that guide all living systems self organization interdependence and diversity Amid a wealth of new insights into Toyota's vaunted system Johnson and Bröms introduce the tools of MBM to show how design production and profitability analysis are done to customer order They demonstrate that by following the principles that emulate life systems even a lean and profitable company can organize work to greatly lessen its long term earnings instability and sharply reduce its short run operating costs Scania has achieved sixty five years of financial stability and longevity in the face of fierce competition Toyota has amassed a market value since 1988 that has rivaled or sometimes surpassed the American Big Three automakers combined The principles that Johnson and Bröms set forth in *Profit Beyond Measure* can guarantee the same richer longer life to any company that applies them

**African Transport** ,1980      **The Long Haul Pioneers** Ashley Coghill,2020-02-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered In so doing they were solely responsible for creating the first long haul overland route across Europe and deep into the Middle East to Kabul The men had started the Middle East Run was to become a phenomenon in the road haulage industry an image which it still holds today This book is about the company founded by one of those men from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure These early long haul drivers would think nothing of a 10 000 mile round trip to Iran or the Arabian Gulf and being stranded at 6 000 feet on a mountain pass with temperatures below 40 was just all in a day s work Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images The end result is a detailed comprehensive and fascinating account of an extraordinary company      *Trucks* John Tipler,1999-09 Describes different kinds of trucks from more than 30 leading manufacturers      *Stanley's Story Volume 2* Stanley Graham,2010      **Highways & Road Construction International** ,1976      *The Road Way* ,1990      **Highways & Road Construction** ,1976      *Eureka* ,2004      **Beyond the Bosphorus: British Drivers on the Middle-East Routes** Dave Bowers,2015-07-01 The Middle East has always been one of the most challenging destinations for lorry drivers In the 1970s and 80s many drivers may not have even heard of the destinations they were sent to before heading out eastwards Along the way they endured extreme weather conditions bureaucratic nightmares and the physical trials of keeping themselves and their trucks operational over many thousands of miles of poorly maintained and dangerous roads Their adventures have become legendary within the trucking world In this book Dave Bowers tells with humour and insight the amazing stories of people driving to Middle East destinations battling against all the odds to deliver their loads The inspiration comes from his own experience through those routes and in particular on one adventurous journey homewards from Tehran in 1975 when he happened to be stranded in Iran with no cash to speak of and spending many nights sleeping in abandoned trailers along the way Dave travelled homewards after he was given lifts in trucks returning to Europe These were driven by drivers who had many tales to tell and this book was motivated by the need to keep these fascinating stories alive Illustrated with photographs of the drivers and vehicles taken at the time Beyond the Bosphorus records what it was like for ordinary HGV drivers to get involved in something so dramatically different from their everyday working lives in the UK It will be of interest to lorry drivers general vehicle enthusiasts and also those with a historical and social interest in the Middle East alike      *Highways + Public Works* ,1981      *World Fishing* ,1992      **The World of Automobiles** ,1974
