

Scene Analysis

Romeo and Juliet's Act 3 Scene 1, is a scene that is filled with various different moods, and emotions, which are all motivated differently. Benvolio, Mercutio, Romeo and Tybalt all play major rolls in this scene that display characteristics of friendship, revenge, hate, violence, fate, etc. This scene begins with Benvolio and Mercutio talking, but as Tybalt enters, so does trouble. This changes the atmosphere in the scene and makes it very serious. This scene ends with Mercutio getting killed and changes the scene to a sadder feeling.

Benvolio was the most sensible and responsible one in this scene, who reported to the Prince and Romeo's parents. Even though he was sensible, he was feeling afraid. Benvolio said, - *"I pray thee, good Mercutio, let's retire:"* which proves that he was feeling afraid, because the Capulet's were coming. He said, *"And if we meet, we shall not 'scape a brawl."* He was feeling worried when he said that because he knew that something atrocious was going to happen. He was even more worried when he said this, *"We talk here in the public haunt of men: Either withdraw unto some private places"*. He was trying to stop the fight and he also wanted them to not fight in public because of the Prince. It is very typical of Benvolio to tell Mercutio to not fight Tybalt, because he's the sensible one, who doesn't want any trouble to be caused. Benvolio was the *nice* guy from Tybalt, Mercutio and Romeo.

Mercutio was the fearless and confident one in this scene. He said, *"By my heel, I care not."* This shows that he was excited and confident when he was saying this, but there is plenty of irony in it too. Mercutio and Benvolio are both playing two very different roles in this scene. This is because Mercutio wants to have a fight, whereas Benvolio does not want there to be any fight between anyone. When Tybalt enters the scene, Mercutio started taunting him. He was very confident and wasn't scared of Tybalt. When Tybalt says, *"thou consort'st with Romeo"* it gets Mercutio very mad. Mercutio was getting angry and he's thinking why Romeo is refusing to fight with Tybalt. When this had been said, *"O calm, dishonorable, vile submission!"* Mercutio feels that Romeo is dishonoring him. This feeling of dishonor them motivates him to fight Tybalt. He says, *"Tybalt, you rat-catcher, will you walk?"* Mercutio is a really good friend of Romeo's and he doesn't want anyone to insult him, so it is very typical of him to fight Tybalt on Romeo's behalf. When Mercutio get's stabbed he says, *"Ay, ay, a scratch, a scratch; marry, 'tis enough."* This shows that he is trying to not scare the others by saying he's not that hurt. He also says a pun when he says, *"Ask for me tomorrow, and you shall find me a grave man."* Mercutio said something that both the prologue and the Prince say. He says, *"A plague o' both your houses!"*

Tybalt was an impetuous young man. When he enters the scene he says, *"Follow me close, for I will speak to them."* He was looking and anticipating a fight, and he walked with such confidence. Tybalt also gets mad after Mercutio says, *"make it a word and a blow."* It is very typical of Tybalt to want to fight Mercutio, because since he is such a hotheaded person, it's very easy for him to get intimidated. When Romeo enters

Cook, 2016-01-02 Crime Scene Management and Evidence Recovery is a must have for first responders and crime scene investigators alike. Featuring step by step guidance on the techniques involved in crime scene management and evidence recovery alongside hands on advice and aide memoirs from crime scene investigators the second edition also includes clear scientific explanations and everyday examples for the non specialist to recognise the importance difference that first responders can make. Whilst crime scene investigators are trained to undertake more detailed forensic examination the actions of first responders can have a fundamental impact on the success of an examination. By increasing the awareness of forensic aspects of a crime scene investigation this book ensures that crime scene officers are better equipped to make informed decisions about protecting and preserving scenes and recovering items for evidence. It also helps all police and forensic professionals to develop their understanding of the various analysis techniques available as well as the pitfalls to avoid. The fifteen chapters offer structured advice on the techniques involved in the preservation recovery packaging and storage of different evidential types such as fingerprints DNA glass footwear paint and fibres. An overview of the science behind the various types of forensic analysis is presented alongside the relevant legislation to reinforce the value of accurate crime scene management within the duration of an investigation and practical tips scenarios and knowledge checks help to test understanding and root best practice within everyday policing. The Blackstone's Practical Policing Series covers a range of topical subjects of vital importance in today's policing arena. Each practical guide contains clear and detailed explanations of the relevant legislation accompanied by practical scenarios illustrative diagrams and useful checklists. Packed with a wealth of information the Blackstone's Practical Policing Series ensures you have ready access to the tools you need to take on any policing challenge.

Invariants for Pattern Recognition and Classification Marcos A. Rodrigues, 2000. This book was conceived from the realization that there was a need to update recent work on invariants in a single volume providing a useful set of references and pointers to related work. Since the publication in 1992 of J. L. Mundy and A. Zisserman's *Geometric Invariance in Computer Vision* the subject has been evolving rapidly. New approaches to invariants have been proposed and novel ways of defining and applying invariants to practical problem solving are testimony to the fundamental importance of the study of invariants to machine vision. This book represents a snapshot of current research around the world. A version of this collection of papers has appeared in the *International Journal of Pattern Recognition and Artificial Intelligence* December 1999. The papers in this book are extended versions of the original material published in the journal. They are organized into two categories: foundations and applications. Foundation papers present new ways of defining or analyzing invariants and application papers present novel ways in which known invariant theory is extended and effectively applied to real world problems in interesting and difficult contexts. Each category contains roughly half of the papers but there is considerable overlap. All papers carry an element of novelty and generalization that will be useful to theoreticians and practitioners alike. It is hoped that this volume will be not only useful but also inspirational to researchers in image processing pattern recognition.
