General Catalogue of Printed Books British Museum. Department of Printed Books,1963 *TCP 2006* J. Dilling,M. Comyn,J. Thomson,G. Gwinner,2007-11-02 The TCP06 conference in Parksville on Vancouver Island showcased the impressive progress in the study of fundamental physics using trapped charged particles Atom and ion trapping has revolutionized atomic physics and related fields It has proven to be particularly useful for fundamental physics experiments as the tight control over the particles degrees of freedom leads to increased precision and efficient use of exotic

species such as radioactive atoms or anti matter The topics of the meeting included fundamental interactions and symmetries quantum electrodynamics quantum state manipulation and quantum information precision spectroscopy and frequency standards storage ring physics highly charged ions in traps traps for radioactive isotopes plasmas and collective behaviour and anti hydrogen Highlights from related fields such as fundamental physics studies with neutral trapped atoms were also presented The combination of overview articles by leaders in the field and detailed reports on recent research results will without doubt make these proceedings an extremely useful reference for researchers within the community but also for those who study similar physics with different techniques or use trapping methods for different purposes General catalogue of printed books British museum.
