mental disorders have become increasingly commonplace over the past half century but the decision making process for doing so continues to lack real clarity Clinicians and patients alike face new challenges and questions thanks to the increasing availability of these drugs When is the right time to prescribe something Can I predict which drug will help this individual When do I consider changing a medication How do I assess whether a drug's side effects make it worthwhile or not The response to these challenging questions is not to stop medicating altogether Psychotropic medications are useful clinical tools But now more than ever we must consider what it means to medicate judiciously It is time to slow down pause maybe even back up a bit and reconsider how and why various drugs should be prescribed and monitored for success The goal of this book is to encourage prudent informed and appropriate use of psychotropic medications to encourage use that is respectful and aware of the strengths and limitations of these drugs By presenting some fundamental principles of pharmacology as they apply to the clinical treatment of patients and by offering practical big picture prescribing recommendations Psychopharmacology Problem Solving helps to unravel an increasingly complex decision making process The first part of the book offers guidelines to keep in mind when working toward making informed choices regarding drug therapy The second part of the book offers select examples of behavioral problems and psychological disorders including addiction obesity schizophrenia depression anxiety and ADHD to illustrate how the principles or recommendations presented in Part I actually play out The book concludes by considering the persistent problems and challenges that we face in our current and future use of psychotropic medications Taking a hard look at the extraordinary and increasing trust clinicians patients and families of patients place in drug therapy for mental illness this book gives readers an evidence based anchor to help them make the right decisions
