Building Peace in America Emily Sample,Douglas Irvin-Erickson,2020-07-22 America may not be at war but it is not at peace Recent public and political rhetoric have revealed the escalation of a pervasive and dangerous us versus them ideology in the United States This powerful book is motivated by the contributors recognition of continuing structural violence and injustice which are linked to long standing systems of racism social marginalization xenophobia poverty and inequality in all forms Calls to restore America s greatness are just the most recent iteration of dehumanizing language against minority communities The violation of the civil and human rights of vulnerable groups presents a serious threat to American democracy These deeply rooted and systemic inequities have no easy solutions and the destructive nature of today s conflicts in America threaten to impede efforts to build peace promote justice and inspire constructive social change Acknowledging the complexity of building peace in the United States this volume represents the first step in envisioning a more just peaceful country from the grassroots to the highest levels of leadership The editors have brought together a diverse group of scholars conflict resolution practitioners civil society leaders community peacebuilders and faith leaders who are committed to pro social change Collectively they examine how best to understand the current issues deescalate destructive public rhetoric undermine the us versus them polarity and support those currently working for positive change Together the contributors share experiences and perspectives on the past present and future of peacebuilding develop a vision for how we can collectively respond in our communities campuses and congregations and catalyze action during this pivotal moment in America **Decolonizing Religion and Peacebuilding** Atalia Omer,2023 An investigation of what consolidating religion as a technology of peacebuilding and development does to people s accounts of their religious and cultural traditions and why interreligious peacebuilding entrenches colonial legacies in the present Throughout the global south local and international organizations are frequent participants in peacebuilding projects that focus on interreligious dialogue Yet as

Atalia Omer argues in *Decolonizing Religion and Peacebuilding* the effects of their efforts are often perverse reinforcing neocolonial practices and disempowering local religious actors Based on empirical research of inter and intra religious peacebuilding practices in Kenya and the Philippines Omer identifies two paradoxical findings first religious peacebuilding practices are both empowering and depoliticizing and second more doing of religion does not necessarily denote deeper or more critical religious literacy Further she shows that these religious actors generate decolonial openings regardless of how closed or open their religious communities are Hence religion s occasional usefulness in peacebuilding does not necessarily mean justice oriented outcomes The book not only uses decolonial and intersectional prisms to expose the entrenched and ongoing colonial dynamics operative in religion and the practices of peacebuilding and development in the global South but it also speaks to decolonial theory through stories of transformation and survival
