

Introduction

Thank you for purchasing the Peachtree Audio Nova amplifier.

While Peachtree Audio is a new company, the people behind the design and marketing of this fine product have been in the Consumer Electronics business over 30 years. The design of the Nova is an attempt to marry audiophile level amplification with the unique capabilities of external Digital to Analog converters. The ability to process and play compressed and uncompressed music files that have been downloaded to hard drives makes the Nova a unique product. The fact that it easily improves upon the performance of most computer-audio systems is a big plus, and our original goal.

This manual is your guide to the functions and connections associated with the Nova. It will process a host of digital audio sources from the Apple Airport to the Slim Devices Squeezebox, to the Roku SoundBridge, to the Linksys Music Bridge, to the Sonos ZP80, and to the digital output of your CD player. And of course, you can play an iPod in to it, too.

We sincerely hope that the Nova provides you with years of trouble-free music listening, and that you will use it often. We will try to keep updates on our website, <http://signalpath.com/index.htm>, and you may also want to contact your dealer should you have any questions. While you're thinking about it, please go to Peachtreeaudio.com and register your Nova for peace of mind.

Thanks again, and Happy Listening!

Other Helpful Tips

- 1) Always set your computer and Music program volume control to maximum and use the Nova volume as a master control. It sounds better that way.
- 2) Avoid keeping multiple programs open while streaming music. It can compromise the sound quality and even cause signal dropouts.
- 3) Avoid plugging and unplugging the USB input multiple times in a short time span. It usually is not a problem but increases the chance of a voltage spike to the USB input.
- 4) Give the Nova adequate ventilation as it will get fairly warm.
- 5) The blue lighted ring around the digital inputs of the Nova have a diagnostic built in. If the digital signal is not locked on the DAC it will continue to blink. Check your connections and be sure your source is turned on and playing. If it still blinks with no sound feel free to call us at the number below.

As we develop more computer-audio products and gain more knowledge we'll post helpful tips on our website:

Interested in the Green Movement?

- 1) The Nova meets the European RoHS standards for non-hazardous metals
- 2) The veneers in the Nova cabinet come from sustainable forests with the FSC certification
- 3) The Nova utilizes a standby transformer that draws less than a watt in the US and less than 2 watts in countries with 220V electrical service
- 4) We will continue to investigate more ways of making our products environmentally friendly as we develop Peachtree Audio in to a full line.
