Evolution

Q: What is natural selection?

16.1 What patterns of biodiversity did Darwin observe aboard the *Beagle*?

WHAT I KNOW

SAMPLE ANSWER: On each island that Darwin visited, he saw different species of plants and animals.

WHAT I LEARNED

SAMPLE ANSWER: Darwin noticed that different, yet similar, species inhabited separated, but similar, habitats around the globe. Also, different, yet related, species often occupied different habitats within a local area.

16.2 How did other scientists' work help Darwin develop his theory of natural selection?

SAMPLE ANSWER: Other scientists did research on how organisms inherited different traits.

16.3 What is Darwin's theory of evolution by natural selection?

SAMPLE ANSWER: Organisms that are best adapted to their environment survive longer and have more offspring.

SAMPLE ANSWER: Natural selection is the process by which organisms with variations most suited to their local environment survive and leave more offspring. Over time, beneficial traits accumulate in a population.

16.4 What are the main lines of scientific evidence that support Darwin's theory of evolution by natural selection?

SAMPLE ANSWER: Fossils show how organisms have changed over time.

SAMPLE ANSWER: Biogeography, fossils, homologous structures, similarities in embryological development, the universal genetic code, homologous molecules, and field studies provide evidence of evolution.

Pearson Biology Workbook Darwin Answers Ch 15:

Biology Neil A. Campbell, Jane B. Reece, 2005 Neil Campbell and Jane Reece's BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept; and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter.

Data governance in African health research: ELSI challenges and solutions Donrich Thaldar, Simisola Oluwatoyin Akintola, Bonginkosi Shoji, 2025-04-02

Data protection legislation is increasingly being enacted in African countries. Additionally, the African Union recently adopted the AU Data Protection Framework. How are these legal and policy developments influencing established ethics notions about data governance in health research? For example, is broad or tiered consent to research participation sufficient, or does new legislation require specific consent? How do individual rights in data interact with communitarian values? Should health research receive special treatment from a data protection regulatory perspective? How should African countries approach AI in healthcare? This research topic aims to identify and analyse ELSI challenges in contemporary data governance in African health research and to develop possible solutions for such challenges. Articles in this research topic will aim to assist policy makers, health researchers, and ELSI practitioners in Africa to better navigate and, where relevant, improve data governance in African health research. Perspective style articles as well as more in-depth research articles are welcome. While articles can analyse fundamental theoretical issues, application-oriented articles and articles that explore lessons learnt in practice are especially encouraged. Authors should address one or more of the following inter-related themes within the research topic of data governance in African health research:

1. Conflicts between new legal and policy developments and established ethics notions
2. Africanisation, decolonisation, and intra-African rule harmonisation
3. The evolution of informed consent and the role of trust
4. The various legal, ethical, and social dimensions or meanings of data and how these dimensions interact
5. Power and control. This includes individual, institutional, ethnic, community, and national claims to data. It also includes existing and proposed structures of control of data, such as data trusts and data transfer agreements (DTAs).
6. Engagement with data protection regulatory authorities
7. Artificial intelligence and Big Data
