Primary Activities

Human activities which generate income are known as *economic activities*. Economic activities are broadly grouped into primary, secondary, tertiary and quaternary activities. Primary activities are directly dependent on environment as these refer to utilisation of earth's resources such as land, water, vegetation, building materials and minerals. It, thus includes, hunting and gathering, pastoral activities, fishing, forestry, agriculture, and mining and quarrying.

Why are the inhabitants of coastal and plain regions engaged in fishing and agriculture respectively? What are the physical and social factors which affect the type of primary activities in different regions?

DO YOU KNOW

People engaged in primary activities are called red-collar workers due to the outdoor nature of their work.

HUNTING AND GATHERING

The earliest human beings depended on their immediate environment for their sustenance. They subsisted on: (a) animals which they hunted; and (b) the edible plants which they gathered from forests in the vicinity.

Primitive societies depended on wild animals. People located in very cold and extremely hot climates survived on hunting. The people in the coastal areas still catch fish though fishing has experienced modernisation due to technological progress. The early hunters used primitive tools made of stones, twigs or arrows so the number of animals killed was limited. Why has hunting been banned in India?

Gathering and hunting are the oldest economic activity known. These are carried out at different levels with different orientations.

Gathering is practised in regions with harsh climatic conditions. It often involves primitive societies, who extract, both plants and

Reading Actively in Middle Grade Social Studies Don K. Philpot, 2019-08-14 Middle grade students can learn a great deal about themselves and their world by reading informative texts in social studies courses. These texts will focus on important topics in history, geography, civics, government, and economics and offer students a range of perspectives on past and present social events. But reading is a complex act and most students need specific reading-related support to understand assigned texts in middle grade social studies courses. This book focuses on the cyclical nature of reading: the actions proficient readers engage in to understand social studies textbooks and other informational texts and the instructional support that teachers can provide to enhance middle grade students' learning of social studies content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail and how do they relate to each other? What teacher-mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading? **A-level**

I See What You Mean Steve Moline, 2023-10-10 Some educators may view diagrams pictures and charts as nice add on tools for students who are visual thinkers But Steve Moline sees visual literacy as fundamental to learning and to what it means to be human In Moline's view we are all bilingual Our second language which we do not speak but which we read and write every day is visual From reading maps to decoding icons to using concept webs visual literacy is critical to success in today's world The first edition of I See What You Mean published in 1995 was one of the first books for teachers to outline practical strategies for improving students visual literacy In this new and substantially revised edition Steve continues his pioneering role by including dozens of new examples of a wide range of visual texts from time maps and exploded diagrams to digital tools like smartphone apps and tactile texts In addition to the new chapters and nearly 200 illustrations Steve has reorganized the book in a useful teaching sequence moving from simple to complex texts In one research strategy called recomposing Steve shows how to summarize paragraphs of information not as a heap of interesting facts but as a diagram The diagram can then work as a framework for students to follow when writing an essay This overcomes the teacher's problem of cut and paste essays and by following their own diagram summary students have an answer to their familiar questions Where do I start What do I write next

respectability femininity and motherhood are embodied by fashion and shaped by class In unpacking this fashion class relationship the book explores how fashion is used by British women to talk about class It offers important insights into the ways fashion mobilises class differences in understandings of dressing up performance and public space It considers how class identity shapes women s attitudes concerning fashion trends and classic styles and it draws attention to the pivotal role mothers play in cultivating these class distinctions The book will be of interest to students in sociology fashion studies cultural studies human geography and consumer behaviour
