This book contains the refereed proceedings of the 17th International Conference on Agile Software Development XP 2016 held in Edinburgh, UK, in May 2016. While agile development has already become mainstream in industry, this field is still constantly evolving and continues to spur an enormous interest both in industry and academia. To this end, the XP conference attracts a large number of software practitioners and researchers, providing a rare opportunity for interaction between the two communities. The 14 full papers accepted for XP 2016 were selected from 42 submissions. Additionally, 11 experience reports from 25 submissions, 5 empirical studies out of 12 submitted, and 5 doctoral papers from 6 papers submitted were selected, and in each case, the authors were shepherded by an experienced researcher. Generally, all of the submitted papers went through a rigorous peer review process. *Research Methods in Business* R. Nandagopal, K. Arul Rajan, N. Vivek, 2008

Conducting research and analysis is becoming an important skill for students of management. It is very important that they understand research methods and business statistics. Statistical Models for Test Equating, Scaling, and Linking Alina von Davier, 2010-10-19. The goal of this book is to emphasize the formal statistical

features of the practice of equating linking and scaling The book encourages the view and discusses the quality of the equating results from the statistical perspective new models robustness fit testing hypotheses statistical monitoring as opposed to placing the focus on the policy and the implications which although very important represent a different side of the equating practice The book contributes to establishing equating as a theoretical field a view that has not been offered often before The tradition in the practice of equating has been to present the knowledge and skills needed as a craft which implies that only with years of experience under the guidance of a knowledgeable practitioner could one acquire the required skills This book challenges this view by indicating how a good equating framework a sound understanding of the assumptions that underlie the psychometric models and the use of statistical tests and statistical process control tools can help the practitioner navigate the difficult decisions in choosing the final equating function This book provides a valuable reference for several groups a statisticians and psychometricians interested in the theory behind equating methods in the use of model based statistical methods for data smoothing and in the evaluation of the equating results in applied work b practitioners who need to equate tests including those with these responsibilities in testing companies state testing agencies and school districts and c instructors in psychometric measurement and psychology programs
