Machine Learning Used in Biomedical Computing and Intelligence Healthcare, Volume I Honghao Gao, Ying Li, Zijian Zhang, Wenbing Zhao, 2021-06-17 *Computer Applications in Architecture* Mr. Rohit Manglik, 2024-09-12 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Towards a Design Flow for Reversible Logic** Robert Wille, Rolf Drechsler, 2010-07-28 The development of computing machines found great success in the last decades But the ongoing miniaturization of integrated circuits will reach its limits in the near future Shrinking transistor sizes and power dissipation are the major barriers in the development of smaller and more powerful circuits Reversible logic provides an alternative that may overcome many of these problems in the future For low power design reversible logic offers significant advantages since zero power dissipation will only be possible if computation is reversible Furthermore quantum computation profits from enhancements in this area because every quantum circuit is inherently reversible and thus requires reversible descriptions However since reversible logic is subject to certain restrictions e.g. fanout and feedback are not directly allowed the design of reversible circuits significantly differs from the design of traditional circuits Nearly all steps in the design flow like synthesis verification or debugging must be redeveloped so that they become applicable to reversible circuits as well But research in reversible logic is still at the beginning No continuous design flow exists so far In this book contributions to a design flow for reversible logic are represented This includes advanced methods for synthesis optimization verification and debugging **Logics in Artificial Intelligence** Steffen Hölldobler, Carsten Lutz, Heinrich Wansing, 2008-09-25 This book constitutes the refereed proceedings of the 11th European Conference on
