It provides students with a practical introduction to working in a children's service environment whilst helping to bridge the gap between theory and best practice. It is designed to address the relevant units of competency in a holistic and integrated way while covering the skills and knowledge students need to be deemed competent in this qualification.

Mathematical Problem Solving Peter Liljedahl, Manuel Santos-Trigo, 2019-02-12. This book contributes to the field of mathematical problem solving by exploring current themes, trends, and research perspectives. It does so by addressing five broad and related dimensions: problem solving heuristics, problem solving and technology inquiry, and problem posing in mathematics education, assessment of and through problem solving, and the problem solving environment. Mathematical problem solving has long been recognized as an important aspect of mathematics teaching and learning. Mathematics education has influenced mathematics curricula around the world with calls for the teaching of problem solving as well as the teaching of mathematics through problem solving. And as such, it has been of interest to mathematics education researchers for as long as the field has existed. Research in this area has generally aimed at understanding and relating the processes involved in solving problems to students' development of mathematical knowledge and problem solving skills. The accumulated knowledge and field developments have included conceptual frameworks for characterizing learners' success in problem solving activities, cognitive, metacognitive, social, and affective analysis, curriculum proposals, and ways to promote problem solving approaches.

Innovation, Entrepreneurship and Culture Terrence E. Brown, J. M. Ulijn, 2004-01-01. The purpose of this book is to examine the nature of organizational innovation and change by looking at the complex interplay between entrepreneurship, innovation, and culture.

Educational Psychology: Constructing Learning Dennis M. McInerney, 2013-08-15. Educational Psychology: Constructing Learning 6e sets the standard for educational psychology texts in Australia and New Zealand with its comprehensive, authoritative, and research-based coverage of the subject. This edition includes completely updated content to reflect recent advances in the discipline, including revised theory into practice features from 39 international developmental psychologists. The author has retained the constructivist approach that made previous editions so engaging and relevant to student teachers, and content has been constructed around the new Australian Profession Standards for Teachers.
