## STUDY GUIDE: ENERGY

### STUDY GUIDE

### TYPES OF ENERGY

#### Kinetic Energy and Rotational Kinetic Energy

- **Kinetic energy** is the energy of an object or system due to its motion. There are two types: translational kinetic energy and rotational kinetic energy. Both of these are types of **mechanical energy**.
- Kinetic energy is a **scalar quantity** (not a vector quantity) so it's always positive. It does not have a direction and it does not depend on the direction of the object's or system's velocity.
- **Translational kinetic energy** or **linear kinetic energy** (often just referred to as kinetic energy) is the energy of an object or system due to its linear motion and depends on its mass and linear speed.
