Blended learning environments to foster self-directed learning Christo van der Westhuizen,Mncedisi C. Maphalala,Roxanne Bailey,2023-03-31 This book on blended learning environments to foster self directed learning highlights the focus on research conducted in several teaching and learning contexts where blended learning had been implemented and focused on the fostering of self directed learning

Several authors have contributed to the book and each chapter provides a unique perspective on blended learning and self directed learning research. From each chapter it becomes evident that coherence on the topics mentioned is established. One of the main aspects drawn in this book and addressed by several authors in the book is the use of the Community of Inquiry (CoI) framework when implementing teaching and learning strategies in blended learning environments to foster self directed learning. This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book. What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter, albeit theoretical, methodological or empirical in nature. This in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self directed learning.

Internationalisation and Globalisation in Mathematics and Science Education Bill Atweh, Angela Calabrese Barton, Marcelo C. Borba, Noel Gough, Christine Keitel-Kreidt, Catherine Vistro-Yu, Renuka Vithal, 2007-08-28

In the new times of globalisation, international academic contacts and collaborations are ever increasing. They are taking many forms from international conferences and publications, student and academic exchange, cross cultural research projects, curriculum development to professional development activities and affect every aspect of academic life from teaching research to service. This book aims to develop theoretical frameworks of the phenomena of internationalisation and globalisation. It identifies related ethical, moral, political and economic issues facing mathematics and science educators. It provides a venue for the publication of results of international comparisons on cultural differences and similarities rather than merely on achievement and outcomes. The book represents the different voices and interests from around the world rather than consensus on issues and serves as a forum for critical discussion of the various models and forms of international projects and collaborations.
