Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes

The Future of Insurance Regulation in the United States Martin F. Grace, Robert W. Klein, 2009-12-01 A Brookings Institution Press and Georgia State University publication Important changes have buffeted the insurance industry over the past decade The 1999 repeal of key provisions of the Glass Steagall Act unleashed a wave of conglomeration in financial services as bank holding companies acquired insurance and securities businesses and to a much lesser degree insurance companies acquired securities firms and banks Rivalry within the sector has intensified insurance companies have developed products that compete directly with the offerings of banks and securities firms and vice versa In addition the industry has become increasingly global Against this backdrop pressure has been building for fundamental changes to the structure of insurance regulation in the United States Despite several court challenges over the years insurance continues to be regulated by the states Many insurance companies view state regulation as an increasing drag on their efficiency and competitiveness and support a federal regulatory system However powerful stakeholders including state officials state and regional insurance companies and many insurance agents oppose federal regulation As a result proposals to establish an optional federal charter OFC for insurance companies and agents remain mired in fierce debate The Future of Insurance Regulation in the United States gathers some of the country's leading experts on financial regulation to assess the case for an enhanced federal role in the insurance sector They pay particular attention to the merits of an OFC and how it might be designed They also consider the principles that should guide insurance regulatory policies regardless of the institutional framework and examine the implications of financial convergence and the internationalization of insurance markets for an optimal regulatory structure The debate over insurance regulation has only grown in complexity and intensity since the financial crisis began in the fall of 2008 This book will both inform and help to shape those critical discussions Contributors John A Cooke International Financial Services London Robert Detlefsen National Association of Mutual Insurance Companies Martin F Grace Georgia State University Robert W Klein Georgia State University Robert E Litan Ewing Marion Kauffman Foundation and Brookings Institution Phil O Connor PROactive Strategies Hal S Scott Harvard Law School Harold D Skipper Georgia State University Peter J Wallison American Enterprise Institute
