concept of musical tonality through the writings of the Belgian musicologist François Joseph Fétis 1784-1867 who was singularly responsible for theorizing and popularizing the term in the nineteenth century Thomas Christensen weaves a rich story in which tonality emerges as a theoretical construct born of anxiety and alterity for Europeans during this time as they learned more about other musics and alternative tonal systems Tonality became a central vortex in which French musicians thought and argued about a variety of musical repertoires be they contemporary European musics of the stage concert hall or church folk songs from the provinces microtonal scale systems of Arabic and Indian music or the medieval and Renaissance music whose notational traces were just beginning to be deciphered by scholars Fétis's influential writings offer insight into how tonality ingrained itself within nineteenth century music discourse and why it has continued to resonate with uncanny prescience throughout the musical upheavals of the twentieth and twenty first centuries Lowcountry Boil Susan M.

and Contexts identifies those classics of Roman literature which deserve to survive because of their intrinsic quality and their lasting significance. The most important of these texts are placed in the context of the tradition which each represents and which each group of texts taken together constitutes. Four main streams of tradition are identified: the poet as storyteller, narrative poetry and drama, the poet as teacher, didactic poetry, the poet as himself, personal poetry, and the poetry of social comment and Roman literary prose. Each major text is presented in the form of one or more passages of substantial length for analysis in detail and comparison with related works. The translations used include leading literary translations since the sixteenth century. The result is a history of Roman literature in which the emphasis is laid on the quality of the text discussed rather than on comprehensiveness of treatment and on organic relationships rather than chronology. This book is the result of thirty years of teaching experience by the author and his conviction that existing books on the same subject are inadequate and misleading. It will be of particular interest to students taking classical literature and translation courses, to students of English literature, and anyone who is interested in literature even without a knowledge of Latin.
