

Cut Off Score

Compute the mean and standard deviation of your new test to determine the cut off score.

If done correctly:

$$\text{Mean} = 72$$

$$\text{SD} = 16.73$$

One Standard Deviation would represent 68% of the students assuming a normal curve. Therefore the lower end (below one SD) would represent 16% of the students.

If cutoff is one SD below the mean, students scoring less than 55.27 (scores of 55 and below) would be referred for additional help in mathematics.
