## Scania Truck Manual Book:

The Long Haul Pioneers Ashley Coghill, 2020-02-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered. In so doing they were solely responsible for creating the first long haul overland route across Europe and deep into the Middle East to Kabul. The men had started the Middle East Run, which was to become a phenomenon in the road haulage industry, an image which it still holds today. This book is about the company founded by one of those men from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today. In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure. These early long haul drivers would think nothing of a 10 000 mile round trip to Iran or the Arabian Gulf and being stranded at 6 000 feet on a mountain pass with temperatures below 40 was just all in a day's work. Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication. He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images. The end result is a detailed comprehensive and fascinating account of an extraordinary company. Scientific and Technical Books and Serials in Print, 1984. The long haul overland run to the old Soviet Union prior to Perestroika, Glasnost and the collapse of communism under Gorbachov back in the 1980s and 90s has never really been documented in a book. Other than an occasional tale of the difficulties involved verbalised in pub conversations and passed by word of mouth to those who might be interested enough to listen, it would never see the light of day. This tome is an excellent attempt by the author Mat Ireland to put that lack of the written word to rights. There have been a number of books published about the Golden Era of overland haulage to the Middle East. But while that particular adventure was taking place, there were other frontiers being quietly breached and explored by hauliers pursuing a different market. This book is the story of just such a transport company, Kepstowe Freight. Sometimes known as the alternative Middle East, the overland routes into the old Soviet Union have never had their story recorded in

print yet they were just as gruelling on the driver and machine as any trips to the Arabian Peninsula or Iran Whereas most people s perception of the Middle East is all sunshine and sand the same people s perception of Russia is often all snow and freezing temperatures Of course neither picture is the total truth and the overbearing heat arid climes and loneliness of the central Russian steppes could easily rival the desertification of Syria and Iraq Kepstowe Freight was one of the British companies pioneering these early journeys behind the Iron Curtain into the dark scary world of Soviet Union communism Featuring mostly previously unseen photographs A History of Kepstowe Freight Services Ltd repeats drivers recollections about their escapades and adventures into a land rarely visited by western society and their attempts at dealing with the inherent corruption horrendous roads and unpredictable weather along the way It goes on to show how exponentially rapidly the country changed after its 1990 collapse with the accompanying culture shock to the populace and especially to the transport system *The Publishers Weekly* ,1978 **The Challenges of Vehicle Decarbonization** Jody Emlyn Muelaner,2022-04-27 A narrow focus on electrification and elimination of tailpipe emissions is unlikely to achieve decarbonization objectives Renewable power generation is unlikely to keep up with increased demand for electricity A focus on tailpipe emissions ignores the significant particulate pollution that zero emission vehicles still cause It is therefore vital that energy efficiency is improved Active travel is the key to green economic growth clean cities and unlocking the energy saving potential of public transport The Challenges of Vehicle Decarbonization reviews the urgent need to prioritize active travel infrastructure create compelling mass market cycling options and switch to hybrid powertrains and catenary electrification for long haul heavy trucks The report also warns of the potential increase in miles travelled with the advent of personal automated vehicles as well as the pitfalls of fossil fuel derived hydrogen power Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2022SE1> *Library Journal* ,1994-07 *Britannica Book of the Year* ,1990 *Britannica Book of the Year* Daphne Daume,1990 Encyclopedia Lives in ELC Library 1991 **The Commercial Motor** ,1979
