

Programming System Features

The Learn Function stores feature data into the unit's memory. It is possible to restore and change most of the feature settings using the Control button.

1. Open a door.
2. Turn the system on, then off.
3. Select a feature. Press and hold the Control button. The number of times above indicates the main feature. 1 shows features main 1, 2 shows main 2 and 3 shows the main 3.
4. When the desired main option is selected, release the Control button.
5. Select a feature. Press and release the Control button. The number of times corresponding to the feature may need to change. Then press and hold one more time to select the feature.
6. Program the feature. While holding the Control button, you can program the feature using the remote control.

The system will only run system 1 or system 2 with 1 or system 3. The system will store that last system 1 or system 2 when the system is recording code with 1 or system 3 when there is a descending code.

Main Programming button sends the feature to the factory default.

Learn Feature is programmed

- Other features can be programmed within the same time.
- Feature codes can be deleted.
- The learn feature can be tested if programming is complete.

To remove another feature in the same time

1. Press and release the Control button. The number of times corresponding to release from the feature you just programmed is the feature you want to program.
2. Then press the Control button once more and hold it.

To select another time

1. Press and hold the Control button.
2. After 3 seconds, the unit alternates to the next entry and the door display will indicate which entry has been selected.

The learn mode ends if any of the following occurs

- The open door is closed.
- The system is opened ON.
- There is a no signal for 30 seconds.
- The transmission is powered for every time.

Brady-Olympia,2025-05-23 Advancements in the field of school based health have improved the overall health and mental
well being of students With these advancements school based health providers must be aware of the latest clinical evidence
and technologies in order to provide optimal care for their students The purpose of this book is to provide school based
health providers a comprehensive go to resource to access evidence based recommendations for the assessment screening
triage initial stabilization and treatment and recognition of acute and chronic conditions and disease processes often seen in
students It aims to utilize modern methods of learning for the audience to improve retention and implementation such as
algorithms mnemonics infographics case studies tables and lists etc Authors have been recruited both regionally and
nationally with expertise in school based health and include clinical physicians school nurses and advance practice providers
The text is structured into ten main sections covering an array of topics including medical conditions and disease trauma and
sports medicine and mental behavioral health Each chapter is structured with a brief description of the topic innovations
within the topic field including current research screening or recognition of the disease or injury care plans for students with
the disease or injury complications associated with the disease or injury that may present in the school setting triage based
on the presentation either to an emergency department urgent care center primary care physician s office or remain in
school and the future of each topic field diagnosis with respect to school based health Clinical Considerations in School based
Health is innovative in that the focus is on clinical school based health highlighting recommendations based on the evidence
and research on utilizing innovative methods of learning algorithms mnemonics infographics case studies etc covering hot
topics not often seen in other school based health books and resources and targeting all stakeholders in school based health
