You will need to be able to skip count by 2, 5 and 10 before the exam.

My goal is to be able to skip count by 2 by next Wednesday. I'm going to practice every day.

That's a great plan, don't forget to use the rubric to check yourself.

Transparent goals

Success criteria

Rapid formative feedback

- the more transparent the teacher makes the learning goals, then the more likely the student is to engage in the work needed to meet the goal.

- the more the student is aware of the criteria of success, then the more the student can see the specific actions that are needed to attain these criteria.

- the more there is feedback about progress from prior to desired outcomes the more positive attributes to learning are developed.

The Lean Education Manifesto Arran Hamilton, John Hattie, 2022-03-30 The global expansion of education is one of the greatest successes of the modern era More children have access to schooling and leave with higher levels of learning than at any time in history However 250 million children in developing countries are still not in school and 600 million attend but get little out of it a situation further exacerbated by the dislocations from COVID 19 In a context where education funding is stagnating and even declining Arran Hamilton and John Hattie suggest that we need to start thinking Lean and explicitly look for ways of unlocking more from less Drawing on data from 900 systematic reviews of 53 000 research studies from the perspective of efficiency of impact they controversially suggest that for low and middle income countries Maybe pre service initial teacher training programs could be significantly shortened and perhaps even stopped Maybe teachers need not have degree level qualifications in the subjects they teach and they might not really need degrees at all Maybe the hours per week and years of schooling that each child receives could be significantly reduced or at least not

increased Maybe learners can be taught more effectively and less resource intensively in mixed age classrooms with peers tutoring one another Maybe different approaches to curriculum instruction and the length of the school day might be more cost effective ways of driving up student achievement than hiring extra teachers reducing class sizes or building more classrooms Maybe school based management public private partnerships and performance related pay are blind and expensive alleys that have limited influence or impact on what teachers actually do in classrooms This groundbreaking and thought provoking work also identifies a range of initiatives that are worth starting It introduces the Learning to GO LD methodology to support school and system leaders in selecting implementing and scaling those high probability initiatives and to rigorously de implement those to be stopped It is essential reading for anyone with an interest in education [Visible Learning Guide to Student Achievement](#) John Hattie, Eric M.
