Emiliani, 2012-12-06 This book is based on the papers presented at the Workshop on Rehabilitation of the Visually Impaired held in Florence at the Institute for the Research on Electromagnetic Waves of the Italian Research Council on April 4 6 1984 The Workshop sponsored by the Committee for Medical and Public Health Research of the Commission of the European Communities was meant to exchange ideas about the

need importance and feasibility of a European cooperation in the field of visual impairment and to identify promising research areas where current national activities could take advantage of such a collaboration in order to increase their efficiency. In particular it dealt with the development and use of technical aids mainly based on computers and signal processing techniques and with the elaboration, evaluation and standardization of new methods and tests. The attendance was multidisciplinary including researchers from the fields of technology, medicine and psychology and representatives from organizations involved in the rehabilitation of the visually impaired. Five technical sessions were organized dealing with the following topics: automatic production of Braille and systems for paperless Braille aids for reading and for the interaction with coded information sources; low vision aids; transduction of visual information into a tactile representation; mobility aids. Three different application sectors were mainly considered: education and culture; vocational training; mobility. A final session was devoted to a discussion in working groups. The results are briefly outlined in the following concise report of the Workshop.

The Encyclopedia of Blindness and Vision Impairment Jill Sardegna, Susan Shelly, 2002. A comprehensive guide to causes of blindness, information on diseases and treatments available.
