

# SECTION 3

## Programming Overview

### About Programming

- You can program the system at any time, even at the installer's premises prior to the actual installation.
- Programming can also be performed remotely from the installer's office/home, using an IBM personal computer, a modem, and Compass downloading software.

The following is a list of the various Programming modes used to program this system.

Programming Mode...	Used to ...
Data Field Programming	Program basic data fields used for setting the various system options. Most of the data fields in this system have been programmed for specific default values. However, some fields must be programmed for each particular installation to establish its specific alarm and reporting features.
+56 Zone Programming	Assign zone characteristics, report codes, alpha descriptors, and serial numbers for 5800 RF transmitters. See <b>+56 Zone Programming</b> in <i>Section 5. Menu Mode Programming</i> for procedures for programming zones.
+57 Function Key Programming	Program each of the four alphabet function keys to perform one of several system operations.
+58 Zone Programming (Expert Mode)	Similar to +56 mode, but provides a faster programming procedure and is intended for those more experienced in programming controls of this type.
+79 Output Device Mapping	Assign device addresses used by 4229 or 4204 Relay modules and map specific relays and device outputs, and assign unit codes for Powerline Carrier devices. See <b>About Output Device Programming</b> in <i>Section 5. Menu Mode Programming</i> for details on setting devices for manual/automatic operation.
+80 Output Definitions	Define up to 48 output definitions which can control the output relays mapped using +79 Output Device Mapping mode.
+81 Zone List Programming	Create Zone Lists for relay/powerline carrier zones, chime, night-stay, cross zones, and pager zones.
+82 Alpha Programming	Create alpha descriptors for easy zone identification.
Scheduling Mode (code + [#] +64)	Create schedules to automate various system functions.

### Mechanics of Programming

**To program the system from a keypad:**

- You must use a 2-line Alpha display keypad.
- Both partitions must be disarmed.

#### Data Field Programming Procedures

Task	Procedure
Entering Program Mode	A) Press both [*] and [#] at the same time within 50 seconds after power is applied. OR B) After power-up, enter [Installer code (4-1-1-2)] + 8 0 0 (long beep indicates one of the partitions is armed and system cannot enter program mode). (method "B" is disabled if you exit Program mode using +98)
Go to a Data Field	Press [*] + [Field Number]. A display of "EE" or "Entry Error" means you have entered a nonexistent field. Simply re-enter [*] plus a valid field number.
Entering Data	When the desired field number appears, simply enter the digits required. The keypad beeps three times after the last digit is entered and automatically displays the next data field in sequence. If entering less than the maximum digits available (e.g., phone number field), enter the desired digits, then press [*] to end the entry.
Review a Data Field	Press [#] + [Field Number]. The field's data is displayed, but no changes can be made.
Deleting an Entry	Press [*] + [Field No.] + [*] (applies only to phone number, account number, and pager character fields).
