## Visual CompuSet Professional Edition™

Rapid Application Development (RAD) Solution for Personalization of Print, Web, and E-mail Content

Visual CompuSet Professional Edition™ (VC Pro) offers a Rapid Application Development (RAD) environment to design customized, full color data-intensive documents. From a visual interface for document design, a single source application may be deployed in both print and electronic formats to create dynamic, on-demand, personalized content. Using either a design layout view or object-oriented, tree-directed model, users can apply business rules to document elements to create variable, high quality content without writing code. VC Pro's powerful data processing and composition capabilities make it optimal for producing financial statements, benefit statements and marketing fulfillment pieces to be delivered in print, Web, or e-mail formats.

VC Pro is a modular development environment with optional components depending on business needs. The VC Pro API enables composing and printing documents directly from existing front-end GUIs. The VC Pro Content Composer is ideal for transactional production environments, enabling document applications to be executed concurrently, and from within other applications. The development environment itself is Windows based. Print production is supported on Windows®, UNIX®, and mainframe platforms.

VC Pro's easy-to-use, intuitive graphical user interface (GUI) allows all for three, print, and electronic, document design.

### Key Features and Benefits of VC Pro

- RAD environment with design-rich GUI reduces all needs and development time to market
- Flexible output formats allow customer preferred delivery options for each user
- Fully test even print and electronic formats from a single application and data source reduces development time
- Advanced data processing and composition capabilities create complex print and PDF documents from business data and rules
- Concurrent execution of document applications enables transactional processing
- An API provides flexibility to integrate developed front-end GUIs
