Transatlantic Reflections on the Practice-Based PhD in Fine Art Jessica Schwarzenbach, Paul Hackett, 2015-08-11 Once the US was the only country in the world to offer a doctorate for studio artists however the PhD in fine art disappeared after pressures established the MFA as the terminal degree for visual artists Subsequently the PhD in fine art emerged in the UK and is now offered by approximately 40 universities Today the doctorate is offered in most English speaking nations much of the EU and countries such as China and Brazil Using historical political and social frameworks this book investigates the evolution of the fine art doctorate in the UK what the concept of a PhD means to practicing artists from the US and why this degree disappeared in the US when it is so vigorously embraced in the UK and other countries Data collected through in depth interviews examine the perspectives of professional artists in the US who teach graduate level fine art These interviews disclose conflicting attitudes toward this advanced degree and reveal the possibilities and challenges of developing a potential doctorate in studio art in the US

Exemplars of Truth Keith Lehrer, 2019-01-02 This monograph is both an intellectual summation as well as a philosophical advancement of key themes of the work of Keith Lehrer on several key topics including knowledge self trust autonomy and consciousness He here attempts to integrate these themes and develop an intellectual system that can constructively solve philosophical problems The system is indebted to the modern work of Sellars Quine and Chisholm as well as historically to Hume and Reid At the core of this system lies Lehrer's theory of knowledge which he previously called a coherence theory of knowledge but now calls a defensibility theory Lehrer argues that knowledge requires the capacity to justify or defend the target claim of knowledge in terms of a background system Defensibility is an internal capacity supplied by that system to meet objections to the claim This theory however leaves open the problem of experience noted by other philosophers i.e. how to explain the special role of experience in a background system even granted we are fallible in describing it Lehrer offers a solution to the problem of experience arguing that reflection on experience converts the experience itself into an exemplar something like a sample that becomes a vehicle or term of representation The exemplar represents itself and extends to represent the external world It exhibits something about evidence and truth concerning experience that as Wittgenstein noted cannot be fully described but can only be shown Exemplar representation is the missing link of a background system to truth about the world

Arts Education and Literacies Amy Petersen Jensen, Roni Jo Draper, 2015-06-26 In a struggling global economy education is focused on core subjects such as language arts and mathematics and the development of technological and career readiness skills Arts education has not been a central focus of education reform movements in the United States and none of the current education standards frameworks deeply address the processes texts and literacies that are inherent to arts disciplines This lack of clarity poses a problem for state and district leaders who might be inclined to advocate for the arts in schools and classrooms across the country but cannot find adequate detail in their guiding frameworks This volume acknowledges the challenges that arts educators face and posits that authentic arts instruction and learning can benefit a young person's development both inside and outside of the classroom It presents ways that arts teachers and literacy specialists can work together to help others understand the potential that arts learning has to enhance students' 21st century learning skills
