Jonathan E. Wessell

World Geography Pbl Projects:

Experiential Learning in Geography Jonathan E. Wessell, 2025-02-27 This book provides insight into the importance and impacts that experiential learning has in geographic education Like the first book on experiential learning in geography this volume uses the same three areas experience evaluation and encounters as a guide but broadens the examination by looking at many different types of experiential learning There are inherent differences in planning such experiences both domestically and internationally that become evident throughout the text The book stresses the importance of reflection by the student in the learning process and can be used as a guide to planning As such this book is an essential read for students and faculty studying geography education [Geospatial Technologies and Geography Education in a Changing World](#)

Osvlado Muñiz Solari, Ali Demirci, Joop van der Schee, 2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies GST in formal and informal education The objective of this publication is to inform an international audience of teachers professionals scholars and policymakers about the state of the art and prospects of geospatial practices GPs as organized activities that use GST and lessons learned in relation to geographical education GST make up an advanced body of knowledge developed by practitioners of geographic information systems GIS remote sensing RS global positioning systems GPS and digital cartography DC GST have long been applied in many different sectors however their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s Starting with GIS and RS it evolved into a much broader context as GST expanded to include GPS and DC with new communication technologies and Internet applications GST have been used around the world as a combination of tools and special techniques to make research teaching and learning more effective [Didactic Strategies and Resources for Innovative Geography Teaching](#) García de la Vega, Alfonso, 2022-06-10 Education has undergone a series of changes based on the new technologies strategies and best practices that have been developed in recent years Specifically the way various subjects are taught has developed considerably as education turns toward a more digital approach Geography education is no different and has had to adjust to these innovative practices in order to provide students with the best possible curricula Didactic Strategies and Resources for Innovative Geography Teaching presents educational strategies and resources to promote cross disciplinary approaches to teaching geographic knowledge and skills The book also discusses how geography education boosts essential cognitive and attitudinal processes in personal development fosters critical thinking and builds a society committed to its environment Covering key topics such as mobile learning natural learning environments and geographic information systems this reference work is ideal for teachers geographers researchers scholars academicians practitioners instructors and students

predicaments written by fieldtrip leaders and students from around the world including the UK Canada Singapore Australia and Africa **Schools and Informal Learning in a Knowledge-Based World** Javier Calvo de Mora, Kerry J.

Kennedy, 2019-09-19 This book has two purposes To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning Successive chapters explore what is often seen as a duality between informal and formal learning This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines Recognizing the contribution informal learning can make to young people s understanding and development does not negate the importance of valued social knowledge That complements it Students come to school with knowledge learnt from their families peers the community and both traditional and social media They should not have to unlearn this in order to enter the world of formal learning Rather students different learning worlds should be integrated so that each informs the other In a knowledge based society all learning needs to be valued Some contributors to this book reflect on how new educational systems could be created in a move away from top down authoritarian and bureaucratic management Such open systems are seen to be more welcoming in acknowledging the importance of informal learning Others provide practical examples of how informal learning is currently recognized Some attention is also paid to the evaluation of informal learning A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments *The Social Studies FIELD Guide* Joe
