means of increasing the effectiveness of local intermediaries on whom these elites rely to mobilize political support The book starts with a focus on India and uses original data and a combination of qualitative and quantitative evidence to show support for the argument The study then relies on an original cross national dataset to show how the argument helps explain the variation in the implementation of local democratization reforms across the developing world

**The Case for Business in Developing Economies** Ann Bernstein, 2012-10-03 Business is increasingly being called upon to demonstrate what more it does for society In a climate in which companies are frequently painted as social outlaws who need fundamentally to change their ways this determined if ill founded attack has been met for the most part by appeasement in corporate circles This acquiescence has given rise to the burgeoning corporate social responsibility industry Why is business going along with this The current conversation about business and society is dominated by the perspectives and interests of those who live in rich western countries Many activists analysts and others do not grasp the realities of poverty and the hard choices of development outside the industrialised world As a result the debate about business responsibility and corporate involvement in development is distorted with few voices from developing countries being heard and the positive contribution of just doing business almost completely unacknowledged In this book Ann Bernstein argues that a new approach and a new discourse are required to cut through an increasingly flawed conversation with potentially dangerous consequences for the poor and for developing countries in particular Informed by many years of living working and championing the role of business in growth and development in a middle income developing country Bernstein urges business not to let the attacks stand unchallenged It must find the confidence and strategic vision to stop apologising develop its own public agenda and start propagating the phenomenal benefits of competitive capitalism for the less developed countries of the world
