Classical and Modern Interactions Karl Galinsky, 2010-07-22 Postmodernism multiculturalism the alleged decline of the United States deconstruction leadership and values these topics have been at the forefront of contemporary intellectual and cultural debate and are likely to remain so for the near future Participants in the debate can usefully enlarge the perspective to a comparison between the Greco Roman world and contemporary society In this thought provoking work a noted classics scholar tests the ancient modern comparison

showing what it can add to the contemporary debates and what its limitations are Writing for intellectually adventurous readers Galinsky explores Greece and Rome as multicultural societies debates the merits of classicism in postmodern architecture discusses the reign of Augustus in terms of modern leadership theories and investigates the modern obsession with finding parallels between the supposed decline and fall of Rome and the decay of U S society Within these discussions Galinsky shows the continuing vitality of the classical tradition in the contemporary world The Greek and Roman civilizations have provided us not only with models for conscious adaptation but also points for radical departures This ability to change and innovate from classical models is crucial Galinsky maintains It creates a reciprocal process whereby contemporary issues are projected into the past while aspects of the ancient world are redefined in terms of current approaches These essays result in a balanced assessment and stimulating restatement of some major issues in both contemporary U S society and the Greco Roman world The book which speaks to a wide interdisciplinary audience is based on a series of lectures that Galinsky gave as a national visiting scholar for Phi Beta Kappa It concludes with a discussion of the role of classical studies in the United States today **Research in Education** ,1972-05 Mountain Biodiversity Christian Korner,Eva M.

Spehn,2024-11-01 This book is the result of the first global conference on mountain biodiversity and is a contribution to the International Year of Mountains 2002 The Global Mountain Biodiversity Assessment program is a Special Target Area Region project of DIVERSITAS UNESCO and UNEP Biological diversity is essential for the integrity of mountain ecosystems and this dependency is likely to increase as environmental climate and social conditions change Steep terrain and climate and severe land use pressure cause mountain ecosystems to rank among the world s most endangered landscapes The 28 chapters in this book represent research on the biological riches in all major mountain ranges of the world and synthesize existing knowledge on mountain biodiversity from diversity of bacteria plants and animals to human diversity The book is divided into five sections an introduction providing an overview of the issues plant and animal diversity climate change and mountain biodiversity land use and conservation and a synthesis Critical Qualitative Research in Social Education Cameron White,2015-03-01 Critical qualitative research informs social education through a lens that ensures the investigation of issues in education tied to power and privilege ultimately leading to advocacy and activism The concept of critical is increasingly challenged in this age of neoliberal reform nevertheless critical implies questioning investigating and challenging in terms of equity and social justice leading to critical consciousness Freire 1970 While we resist defining social education as hopefully these ideas concepts are fluid the idea stems from a continual analysis and synthesis of critical theory critical pedagogy media and cultural studies social reconstruction social justice and social studies education framed by culturally responsive pedagogy A social education take on critical qualitative research thus suggests multiple truths and perspectives and focuses on questions rather than answers While many have written on qualitative educational research and some have attempted to integrate critical pedagogy and qualitative research few have explored the specific idea of social

education and critical qualitative research A major issue is that social education claims that there are no set procedures scripted approaches or narrow definitions as to the possibilities of research endeavors Social education researchers make the process and investigation their own and adapt questions procedures methods and strategies throughout the experience This reflects an ever changing criticality in the bricolage of the research Steinberg 2011 Critical qualitative research and social education are vital for the world of the 21st century The onslaught of neoliberalism corporatization standardization testing and the continuing attack on public schools and educators necessitate critical approaches to teaching and learning along with critical qualitative research in social education Ongoing issues with equity and social justice tied to race ethnicity class orientation age and ability linking to schooling education teaching and learning must be addressed The struggle between unbridled capitalism and democracy warrant these investigations in the 21st century hopefully leading to advocacy and activism
