World History Bonnie Zucker Goldsmith, 1998 Guide to Secondary Source, World History Jackson J. Spielvogel, 1997-12-01 **Map Workbook: Exploring the World** Jackson J. Spielvogel, 1997-12-01 The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States **The Human Odyssey** Stephen Green, 2019-09-19 Erudite bold and wide ranging a book that makes you think about knowledge wisdom and what the future has in store PETER FRANKOPAN A book of remarkable sweep and scope not just learned but deeply humane TOM HOLLAND The long human odyssey of self discovery has reached a crucial stage everything we do affects everyone and everything else and we know it The next hundred years will bring more change than we can easily imagine more opportunities for more people to achieve the fulfilment of a good life and more risks that could result in catastrophic harm to the entire planet Viewed geopolitically the main question is whether the world views of the world's most important and influential powers China and America the one fundamentally Confucian the other essentially individualist can be made to work together constructively At the same time on a deeper level the even greater question is how the irreversible fact of urbanisation may nurture healthy and mature human individuality such that the accumulated wisdom of the world's great cultures becomes mutually transforming and enriching This bold and wide ranging book explores those questions with all the risks and opportunities they hold for generations still to come Perspectives: Connecting Past and Present
