Terlizzese,2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul

Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book s theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a postrationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century The Other Ancient Civilizations Raven Todd DaSilva, 2024-10-29 A captivating journey through 15 000 years of fascinating yet often forgotten ancient civilizations and cultures includes maps and illustrations Natasha Billson host The Great British Dig From the world s first peace treaty to daring expeditions across the Pacific this book explores twenty ancient and historic cultures that have had monumental impacts on our modern world but that few people know about Archaeologist Raven Todd DaSilva creator of the popular platform Dig It With Raven looks beyond the familiar names and places and delves into astounding finds unearthed at archaeological sites around the globe Discover the archaeology that sheds light on the secret stories of the Nubians Olmec Xiongnu Minoans Akkadians and many more Rather than focusing only on great rulers and monumental buildings the book highlights the everyday lives of peoples of the past who they interacted with and what we can learn from them Packed with summaries of current archaeological evidence detailed maps and striking images of artefacts and sites The Other Ancient Civilizations reveals how archaeologists decode ancient cultures from what they left behind and is an indispensable collection of fascinating stories and facts that illustrate both the differences and similarities between us and our long distant ancestors A succinct journey through some of the world s less well known complex societies excellent thoroughly researched and admirably illustrated Brian Fagan author of People of the Earth **History of Philosophy and the Reflective Society** Riccardo Pozzo, 2021-10-25 This book is about innovation reflection and inclusion Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing their experiences while appropriating common goods content We are talking of public spaces such as universities academies libraries museums science centres but also of any place in which co creation activities may occur The argument starts with the need for new narratives in the history of philosophy which can be
