The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism

Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

Encounters Old and New in World History Alan Karras, Laura J. Mitchell, 2017-06-30 This collection of essays asserts the specific value of world history research and teaching showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public The twelve contributors each with their own academic areas of interest are experienced scholars and classroom teachers Uniting them together in this volume is their professional relationship with Jerry H Bentley 1949 2012 This shared connection served as a catalyst to showcase Bentley's enduring legacy a commitment to investigating large scale questions with detailed empirical evidence that explains the human condition documenting both patterns of similarity and difference in ways that account for regional and temporal variations The volume continues Bentley's meticulous attention to world historical methods focus on scale cross cultural encounter comparison periodization critical geography and interdisciplinarity Encounters Old and New in World History responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities Contributors interrogate the institutional settings disciplinary proclivities methodological choices and diverse source bases of world history research and teaching Several essays address the ways in which present day concerns influence research on local and global scales Other essays pay particular attention to the production and circulation of knowledge across regional temporal and class boundaries as well as between the academy and the wider public Claiming the centrality of globally informed and focused approaches to historical inquiry researchers continue the conversations that Bentley carried on through his own scholarship teaching editing of the Journal of World History participating in public forums and contributing to public discussions about the place of history in understanding today's global integration The stakes involved in asking

questions about the shared history of humankind continue to increase in the current era of intensified globalization. It is incumbent upon scholars with the skills to work across linguistic, geographic, temporal, and disciplinary boundaries to show the ways that cross-cultural encounters happened historically and to point out how such interactions play out in the institutions, classrooms, and public debates where historical interpretations are created and shared. [A Primer for Teaching World History](#) Antoinette Burton, 2012. This book offers principles to consider when creating a world history syllabus; it prompts a teacher rather than aiming for full world coverage; to pick an interpretive focus and thread it through the course. It will be used by university faculty, graduate students, and high school teachers who are teaching world history for the first time or want to rethink their approach to teaching the subject.
