

# World Regions

The background of the cover is a photograph of a city skyline, likely Hong Kong, with numerous skyscrapers. In the foreground, several large, traditional Chinese lanterns are strung across the frame. There are red lanterns and yellow lanterns, some with intricate patterns and tassels. The sun is visible behind the lanterns, creating a warm, golden glow. The sky is a mix of blue and white clouds.

1.5 billion people in the world who identify themselves as Muslim. Two thirds of the worldwide Muslim population i.e. approximately a billion people live in forty eight Muslim majority countries MMC in the world all of which except one are in Africa and Asia. Of these MMCs in Africa and Asia only twelve inhabited by about 165 million people have ever achieved a high score on the Human Development Index HDI the index that measures life expectancy at birth education and standard of living and ranks how developed a country is. This means that the majority of the world's Muslim population lives in poverty with low or medium level of human development. The contributions to this innovative volume attempt to determine why this is. They explore the influence of environment space and power on human development. The result is a complex interdisciplinary study of all MMCs in Africa and Asia. It offers new insights into the current state of the Muslim World and provides a theoretical framework for studying human development from an interdisciplinary social cultural economic environmental political and religious perspective which will be applicable to regional and cultural studies of space and power in other regions of the world. *The Geography of the World Economy 5th Edition* Paul Knox, John Agnew, Linda

McCarthy, 2014-04-04. *The Geography of the World Economy* provides an in depth and stimulating introduction to the globalization of the world economy. The book offers a consideration of local regional national and global economic development over the long historical term.
