several key contemporary issues which the WTO faces as well as areas that need reforming Each chapter covers a specific topic in relation to the framework and functionality of the WTO with particular focus on the legal aspects of the multilateral trade order The book is guided by the legal pronouncements of the Dispute Settlement Body Panels and Appellate Body and the commentaries on the interpretation of the provisions of the covered agreements This book is ideal for all students studying international trade law including those coming to international law international trade law and WTO law for the first time

The Interaction between World Trade Organisation (WTO) Law and External International Law Ronnie R.F. Yearwood, 2012-05-23 International legal scholarship is concerned with the fragmentation of international law into specialised legal systems such as trade environment and human rights Fragmentation raises questions about the inter systemic interaction between the various specialised systems of international law This study conceptually focuses on the interaction between World Trade Organisation WTO law and external international law It introduces a legal theory of WTO law constrained openness as a way to understand that interaction The idea is that WTO law from its own internal point of view constructs its own law The effect is that external international law is not incorporated into WTO law wholesale but is re constructed as WTO law It follows that legal systems do not directly communicate with each other Therefore to influence WTO law an indirect strategic approach is required which recognises the functional nature of the differentiated systems of the fragmented international legal system

Implementing International Economic Law Yusuf Aksar, 2011-09-23 Implementing International Economic Law focuses on the relationship between the rules of public international law and international economic law from the point of view of dispute settlement mechanisms It demonstrates that the practice of international adjudicative bodies such as the WTO and the ICSID went beyond merely interpreting and applying the rules of law and became international organisations as law makers This is where the sources of international law play a crucial role
