, 2025-01-02 **World Trigger** Daisuke Ashihara, 2014-12-03 *Cultural Identity and Archaeology* Paul Graves-Brown, Siân Jones, Clive Gamble, 1996 Cultural identity is a key area of debate in contemporary Europe. Despite widespread use of the past in the construction of ethnic national and European identity theories of cultural identity have been neglected in archaeology. Focusing on the interrelationships between concepts of cultural identity today and the interpretation of past cultural groups, *Cultural Identity and Archaeology* offers proactive archaeological perspectives in the debate surrounding European identities. This fascinating and thought-provoking book covers three key areas. It considers how material remains are used in the interpretation of cultural identities for example pan-Celtic culture and Bronze Age Europe. Finally it looks at archaeological evidence for the construction of cultural identities in the European past. The authors are critical of monolithic constructions of Europe and also of the ethnic and national groups within it. In place of such exclusive cultural, political and territorial entities the book argues for a consideration of the diverse hybrid and multiple nature of European cultural identities.
