Scott, 2019-06-21 The purpose of this book is to document from basic Soviet sources the development of Soviet military doctrine and its impact upon the Soviet Armed Forces Soviet military doctrine is defined as the military policy of the Communist Party In one way or another this policy affects the lives of all of us as a possible threat to

free institutions and political processes as well as to our economic life and well being Generally we approach Soviet military policy in terms of military balances and weapons comparisons in the number of men under arms the speed of aircraft of the Soviet bloc versus that of NATO aircraft the number of ballistic missiles and their throw weights Studying such balances is of critical importance in defining to some degree existing forces But it is only through a deep and thorough study of the military policy of the Communist Party which translates directly into military doctrine that we can obtain the background that might aid in negotiating with the Soviets on arms control matters or in making decisions that will enable those nations outside of the Soviet bloc to deter future Kremlin military moves
