Alexander Max Bledstein Peter Cullen Bryan Stephen Connor Matthew J Costello Martin Flanagan Michael Fuchs Michael Goodrum Bridget Keown Kaleb Knoblach Christina M Knopf Martin Lund Jordan Newton Stefan Rabitsch Maryanne Rhett and Philip Smith History has always been a matter of arranging evidence into a narrative but the public debate over the meanings we attach to a given history can seem particularly acute in our current age Like all artistic mediums comics possess the power to mold history into shapes that serve its prospective audience and creator both It makes sense then that history no stranger to the creation of hagiographies particularly in the service of nationalism and other political ideologies is so easily summoned to the panelled page Comics like statues museums and other vehicles for historical narrative make both monsters and heroes of men while fueling combative beliefs in personal versions of United States history *Drawing the Past Volume 1 Comics and the Historical Imagination in the United States* the first book in a two volume series provides a map of current approaches to comics and their engagement with historical representation The first section of the book on history and form explores the existence shape and influence of comics as a medium The second section concerns the question of trauma understood both as individual traumas that can shape the relationship between the narrator and object and historical traumas that invite a reassessment of existing social economic and cultural assumptions The final section on mythic histories delves into ways in which comics add to the mythology of the US Together both volumes bring together a range of different approaches to diverse material and feature remarkable scholars from all over the world

**Space in America** ,2005-01-01 America s sense of space has always been tied to what Hayden White called the narrativization of real events If the awe inspiring manifestations of nature in America Niagara Falls Virginia s Natural Bridge the Grand Canyon etc were often used as a foil for projecting utopian visions and idealizations of the nation s exceptional place among the nations of the world the rapid technological progress and its concomitant appropriation of natural spaces served equally well as David Nye argues to promote the dominant cultural idiom of exploration and conquest From the beginning American attitudes towards space were thus utterly contradictory if not paradoxical a paradox that scholars tried to capture in such hybrid concepts as the middle landscape Leo Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America s concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America s search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape
