How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing. *How Students Write* brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers and ultimately learn to construct knowledge in their writing. Drawing on both first year and upper level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence level features such as hedges, perhaps and boosters, definitely, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments and expose and question norms of higher education.

Data Mining and Big Data Ying Tan, Yuhui Shi, Albert Zomaya, Hongyang Yan, Jun Cai, 2021-10-30 This two volume set, CCIS 1453 and CCIS 1454, constitutes refereed proceedings of the 6th International Conference on Data Mining and Big Data (DMBD 2021) held in Guangzhou, China, in October 2021. The 57 full papers and 28 short papers presented in this two volume set were carefully reviewed and selected from 258 submissions. The papers present the latest research on advantages in theories, technologies and applications in data mining and big data. The volume covers many aspects of data mining and big data as well as intelligent computing methods applied to all fields of computer science, machine learning, data mining and knowledge discovery, data science, etc.

Data Abstraction and Pattern Identification in Time-series Data Prithiviraj Muthumanickam,2019-11-25 Data sources such as simulations sensor networks across many application domains generate large volumes of time series data

which exhibit characteristics that evolve over time Visual data analysis methods can help us in exploring and understanding the underlying patterns present in time series data but due to their ever increasing size the visual data analysis process can become complex Large data sets can be handled using data abstraction techniques by transforming the raw data into a simpler format while at the same time preserving significant features that are important for the user When dealing with time series data abstraction techniques should also take into account the underlying temporal characteristics This thesis focuses on different data abstraction and pattern identification methods particularly in the cases of large 1D time series and 2D spatio temporal time series data which exhibit spatiotemporal discontinuity Based on the dimensionality and characteristics of the data this thesis proposes a variety of efficient data adaptive and user controlled data abstraction methods that transform the raw data into a symbol sequence The transformation of raw time series into a symbol sequence can act as input to different sequence analysis methods from data mining and machine learning communities to identify interesting patterns of user behavior In the case of very long duration 1D time series locally adaptive and user controlled data approximation methods were presented to simplify the data while at the same time retaining the perceptually important features The simplified data were converted into a symbol sequence and a sketch based pattern identification was then used to identify patterns in the symbolic data using regular expression based pattern matching The method was applied to financial time series and patterns such as head and shoulders double and triple top patterns were identified using hand drawn sketches in an interactive manner Through data smoothing the data approximation step also enables visualization of inherent patterns in the time series representation while at the same time retaining perceptually important points Very long duration 2D spatio temporal eye tracking data sets that exhibit spatio temporal discontinuity was transformed into symbolic data using scalable clustering and hierarchical cluster merging processes each of which can be parallelized The raw data is transformed into a symbol sequence with each symbol representing a region of interest in the eye gaze data The identified regions of interest can also be displayed in a Space Time Cube STC that captures both the temporal and contextual information Through interactive filtering zooming and geometric transformation the STC representation along with linked views enables interactive data exploration Using different sequence analysis methods the symbol sequences are analyzed further to identify temporal patterns in the data set Data collected from air traffic control officers from the domain of Air traffic control were used as application examples to demonstrate the results

Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model Avgerinou, Maria D.,Pelonis, Peggy,2021-03-05 Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning The i Flex classroom model a variation of blended learning allows non interactive teaching activities to take place without teachers direct involvement freeing up time for more meaningful teacher student and student student interactions There is evidence that i Flex leads to increased student engagement and motivation as well as better exploitation

of teachers and classroom time leading to the development of higher order cognitive skills as well as study skills for students future needs related to citizenship college and careers The Handbook of Research on K 12 Blended and Virtual Learning Through the i Flex Classroom Model focuses not only on how to design deliver and evaluate courses but also on how to assess teacher performance in a blended i2Flex way at the K12 level The book will discuss the implementation of the i Flex isquareFlex a non traditional learning methodology which integrates internet based delivery of content and instruction with faculty guided student independent learning in combination with face to face classroom instruction aiming at developing higher order cognitive skills within a flexible learning design framework While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers this publication is an essential reference source for pre service and in service teachers researchers administrators educational technology developers and students interested in how the i2Flex model was implemented in classrooms and the effects of this learning model

Advances in Digital Marketing and eCommerce Francisco J. Martínez-López, 2023-05-30 The Digital Marketing and eCommerce Conference aims to bring together leading researchers and research scholars to exchange and share their experiences and research results on any aspects of ecommerce and digital marketing This volume presents the proceedings of the 2023 edition in a collection of contributions with many original approaches They address diverse areas of application such as online brand communities channel design online retailing cryptocurrencies user generated content TikTok among others A wide variety of theoretical and methodological approaches have been used

Artificial Intelligence Methods in Intelligent Algorithms Radek Silhavy, 2019-05-04 This book discusses the current trends in and applications of artificial intelligence research in intelligent systems Including the proceedings of the Artificial Intelligence Methods in Intelligent Algorithms Section of the 8th Computer Science On line Conference 2019 CSOC 2019 held in April 2019 it features papers on neural networks algorithms optimisation algorithms and real world issues related to the application of artificial methods

Smart & Sustainable Infrastructure: Building a Greener Tomorrow Nemkumar Banthia, Salman Soleimani-Dashtaki, Sidney Mindess, 2024-02-19 This book gathers peer reviewed contributions presented at the 1st Interdisciplinary Symposium on Smart Sustainable Infrastructure ISSSI held in Vancouver BC Canada on September 4 8 2023 and affiliated with the 77th RILEM Annual Week 2023 Aiming at creating an environment of mutual cooperation between experts in materials and structures it covers topics such as sensors IoT and structural health monitoring AI and machine learning data analytics for infrastructure management nanotechnology additive manufacturing smart and bioinspired materials durability of materials and structures resilience to earthquakes floods fire and blast carbon reduction in construction and operations and sustainable ultra high performance materials The contributions which were selected through a rigorous international peer review process share exciting ideas that will spur novel research directions and foster new multidisciplinary collaborations

Nanotechnology for Bioapplications Bong-Hyun Jun, 2021-03-29 This book

documents the tremendous progress in the use of nanotechnology for a range of bioapplications with the aim of providing students researchers technicians and other professionals with an up to date overview of the field After a general introduction to the surface modifications of nanoparticles required for different biological applications and to the properties of the modified nanoparticles a series of chapters describe the state of the art in respect of different types of nanoparticle including silica nanoparticles fluorescent nanomaterials metal nanoparticles magnetic nanoparticles carbon based nanostructures and other novel nanomaterials Detailed information is supplied on methods of preparation chemical and physical properties and current and potential applications The closing chapters discuss lithography methods for the top down approach to nanoparticle synthesis and the use of spectroscopic studies as a tool for the characterization of each nanoparticle Future prospects and challenges for the development of further nanomaterials with bioapplications are also covered

Optometric Management of Learning-related Vision Problems Mitchell Scheiman, Michael W. Rouse, 2006-01-01 This book explores the relationship between vision and learning and the role of optometrists in the assessment and management of learning related vision problems It discusses normal child development the learning process learning disabilities the relationship between vision and learning and models for managing vision problems affecting learning It is also of interest to health care practitioners involved in the evaluation and treatment of children and adults with learning difficulties Instructor resources are available please contact your Elsevier sales representative for details Presents an organized easy to follow approach to the diagnosis and treatment of learning related vision problems Each chapter contains key terms and chapter review questions making it more appealing to the student and instructor Includes appendices containing sample reports sample questionnaires sample letters a bibliography and case histories showing the reader how to use the material from the book in practice Well respected authors and contributors provide authoritative coverage of the topic Expanded information on the use of colored lenses and reading New chapter on reading disorders that covers how children learn to read teaching methods optometric assessment and management of dyslexia Chapters have been updated with new computer software options including computer aided vision therapy perceptual home therapy system and temporal visual processing program Updated testing battery including new tests visual processing speed and optometric use of IQ screening tests such as K BIT Expanded coverage of psycho education evaluation includes substantial updates with new test instruments such as WISC Substantial revisions based on literature review for last 10 years New and updated illustrations

Teaching Discipline-Specific Literacies in Grades 6-12 Vicky I. Zygouris-Coe, 2014-10-30 Comprehensive timely and relevant this text offers an approach to discipline specific literacy instruction that is aligned with the Common Core State Standards and the needs of teachers students and secondary schools across the nation It is essential that teachers know how to provide instruction that both develops content and literacy knowledge and skills and aims at reducing student achievement gaps Building on the research supported premise that discipline specific reading instruction is key to achieving these goals this text provides practical

guidance and strategies for prospective and practicing content area teachers and other educators on how to prepare all students to succeed in college and the workforce Pedagogical features in each chapter engage readers in digging deeper and in applying the ideas and strategies presented in their own contexts Classroom Life real 6 12 classroom scenarios and interviews with content area teachers Common Core State Standards Connections College Career and Workforce Connections Applying Discipline Specific Literacies Think Like an Expert habits of thinking and learning specific to each discipline Digital Literacies Differentiating Instruction Reflect and Apply Questions Extending Learning Activities The Companion Website includes Lesson plan resources Annotated links to video files Annotated links to additional resources and information Glossary Flashcards For Instructors All images and figures used in the text provided in an easily downloadable format For Instructors PowerPoint lecture slides
