Cheung,Georg A. Constantinides,2003-08-27 This book constitutes the refereed proceedings of the 13th International Conference on Field Programmable Logic and Applications FPL 2003 held in Lisbon Portugal in September 2003 The 90 revised full papers and 56 revised poster papers presented were carefully reviewed and selected from 216 submissions The papers are organized in topical sections on technologies and trends communications applications high level design tools reconfigurable architecture cryptographic applications multi context FPGAs low power issues run time reconfiguration compilation tools asynchronous techniques bio related applications codesign reconfigurable fabrics image processing applications SAT techniques application specific architectures DSP applications dynamic reconfiguration SoC architectures emulation cache design arithmetic bio inspired design SoC design cellular applications fault analysis and network applications      *Assessing the Viva in Higher Education* Stephen Dobson,2017-08-24 This book makes the case for a revival in interest in the viva As an oral assessment of a treatise or dissertation or of a student s performance in art or dance the viva has a long history dating back to the time of the Greeks It can be found today in the form of professional vocational and academic vivas where a judgment of oral performance is required to gain entry into a profession or community of scholars In a time when there are scandals about students selling essays to other students the viva provides a fertile ground for probing the student to see whether they are in fact the authors of the work being assessed and know its content and how to think cognitively or otherwise Given that we actually know so little about the viva the book theorises the viva based on a unique sample of vivas that have been filmed or in which the author himself has been participant and discusses why its format is so different in Anglo Saxon languages and Latin and other languages The book offers educational policy makers and examiners a trade off between arguments in support of the viva and the demand for other ever more cost effective forms of assessment as the numbers of both undergraduate and postgraduate students threaten to increase It also argues that with demand in the labour market for qualified graduates who are better equipped with transferable skills such as the ability to communicate

complex ideas verbally in a competent well argued fashion and not merely through the use of rhetoric what appear to be cost effective forms of assessment in the short run e g written exams with standardised questions or multiple choice may actually in the long run be of less value if we are investing in a future workforce with so called 21st century communication skills If the viva were abandoned the student would be robbed of the opportunity to stage a defence

Thesis Projects Mikael Berndtsson,Jörgen Hansson,B. Olsson,Björn Lundell,2007-10-30 Any B Sc or M Sc study programme in the computing discipline typically ends with a capstone project A capstone project builds and tests the skills and the knowledge acquired during the education and is an essential part of the training towards becoming a professional There is a large number of different terms for these types of projects capstone project senior project final year project B Sc M Sc thesis project etc In this book we will use the term thesis project and in some cases for the sake of simplicity just project This book focuses on thesis projects within the computing discipline Thus the type of project discussed in this book is in line with the capstone format described in the ACM IEEE Computing Curricula 2001 Computer Science p 53 an alternative capstone format is a research experience that includes some original work a review of the scientific literature and an investigation of a proposed solution f lowed by a scientific paper and or an oral presentation of the results It is important to remember that these are undergraduates and be realistic about the amount and quality of research expected Even so it may

be more worthwhile to expose outstanding students to the challenges of research than to have them design and build yet another program In this book we present a process for conducting thesis projects with the research orientation described in the quote above Interdisciplinary Perspectives on Business Convergence, Computing, and Legality Khurana, Reema, Aggarwal, Rashmi, 2013-06-30 As digital technologies develop companies envision new ways to incorporate ever more disparate elements in their products such as the combination of computing power and telecommunications in modern smart phones Interdisciplinary Perspectives on Business Convergence Computing and Legality investigates the development of convergent and interoperable systems in business environments with a particular focus on potential legal implications that emerge when a company begins branching out into domains traditionally occupied by suppliers and consumers Business and law professionals both in academia and in practice will use this book to gain a greater understanding of the growth of convergence in the field of information technologies and how such transformations affect business practices around the world **Bibliographic Guide to Education**, 1991 lists publications cataloged by Teachers College Columbia University supplemented by The Research Libraries of The New York Public Library Navigating Theory, Methodology, and Researcher Development in Doctoral Research Throne, Robin, 2025-06-25 Doctoral research involves more than investigating a specific topic It requires navigating a complex landscape of theory methodology and personal development as a researcher These three elements are interconnected as theory shapes questions asked methodology guides answers and the process produces independent scholars Successfully managing these aspects demands reflection adaptability and a deep engagement with academic traditions and new research practices This may produce new knowledge while fostering the growth of researchers who contribute meaningfully to their fields Navigating Theory Methodology and Researcher Development in Doctoral Research explores various practices in doctoral research practices It examines evolving methodologies theories and developments for improved research applications This book covers topics such as higher education research methods and social science and is a useful resource for librarians educators academicians researchers and scientists Nanoengineering Exam Preparation Cybellium, 2024-10-26 Designed for professionals students and enthusiasts alike our comprehensive books empower you to stay ahead in a rapidly evolving digital world Expert Insights Our books provide deep actionable insights that bridge the gap between theory and practical application Up to Date Content Stay current with the latest advancements trends and best practices in IT AI Cybersecurity Business Economics and Science Each guide is regularly updated to reflect the newest developments and challenges Comprehensive Coverage Whether you're a beginner or an advanced learner Cybellium books cover a wide range of topics from foundational principles to specialized knowledge tailored to your level of expertise Become part of a global network of learners and professionals who trust Cybellium to guide their educational journey [www.cybellium.com](http://www.cybellium.com) *Research in Education*, 1971
