African studies but one constant has been the enduring excellence of the anthology *Africa International Journal of African Historical Studies*. Since the publication of the first edition in 1977, *Africa* has established itself as a leading resource for teaching, business, and scholarship. This fourth edition has been completely revised and focuses on the dynamism and diversity of today's Africa. The latest volume emphasizes contemporary culture, civil and social issues, art, religion, and the political scene, and provides an overview of significant themes that bear on Africa's place in the world. Historically grounded, *Africa* provides a comprehensive view of the ways that African women and men have constructed their lives and engaged in collective activities at the local, national, and global levels. From all indications, the fourth edition of *Africa* should not only endure the test of time but also be found exceptionally useful by a wide spectrum of scholars, including college professors and their students in general.

International Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education

Jeanne Mahoney Leffers, Jennifer Gail Audette, Kevin S. Hardwick, William Van Cleve, 2018-07-31

A critical problem in resource-scarce countries across the globe is the shortage of appropriately trained health care providers. According to the World Health Organization, the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035. This disproportionately affects resource-scarce countries, denying basic health care to millions and limiting access to life-saving treatments. Due to limited resources in these countries, not enough health professionals receive training; few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained. Additionally, many existing providers choose to emigrate in pursuit of professional advancement opportunities, contributing to the overall shortage of qualified health care providers in these environments. Efforts to strengthen health workforce capacity not only increase access, safety, and availability of care but are critical to building resilient health systems capable of caring for the world's neediest populations. This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current providers, advancing the level of practice in accordance with current clinical science, cultivating educators, and enhancing training curricula. It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention. This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships, offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships. Collectively, the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic, non-governmental organizations, and other

global partnership forms The published manuscripts highlight various elements of partnerships with several consistent themes emerging capacity building local empowerment mutual trust and respect long term commitment equity collaboration and the importance of integrating theory and practice for a balance of academic and clinical development The manuscripts provide examples of partnership and educational programs that are in the formative early stages of implementation and others which have been sustained long term some for decades The following eBook is divided into two parts with each part broken down into sections Part I of the eBook includes 18 manuscripts that showcase long term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education including mutual collaboration and project management empowerment of host partners to lead and sustain programs and capacity building While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education Part II manuscripts focus intently on one two elements Part II includes 13 articles that highlight partnership through short rather than long term educational initiatives as well as program development and broad academic partnerships This Research Topic was sponsored by Health Volunteers Overseas a United States based non profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education train the trainer courses professional support and consultation on academic program and curricula development Global Governance Timothy J. Sinclair,2004 **Israel's Mediterranean Gas** Sujata Ashwarya,2019-05-03 This book examines the internal and external implications of Israel s natural gas discoveries in the Eastern Mediterranean The nation s changed status from being an importer of coal and oil to that of an exporter of natural gas has consequences not only for the energy sector but also for the fragile geopolitics of the region The book Explores the challenges and issues of energy economics and governance Analyses Israel s gas diplomacy with its neighbours in the Middle East and North Africa and its potential positive impact on the amelioration of the Arab Israeli conflict Studies how Israel can avoid the deleterious impact of the Dutch disease once the government s share of the export revenues start flowing The author traces a consummate picture of history politics and conflicts that shape the economics of energy in Israel and its future trajectories A major intervention in Middle East studies this volume will be of great interest to scholars and researchers of energy studies development studies strategic studies politics diplomacy and international relations It will also be of interest to government agencies think tanks and risk management firms *The Political Economy of Prosperity* Peter Murphy,2019-10-24 Why do some nations and cities attain high levels of economic and social prosperity What makes them so successful The kinds of factors habitually cited in answer to these questions explain why nations improve their economic and social performance but not why a small group of nations or cities perform much better than the rest Economists stress efficient markets effective industries and functional factors like transport health education and infrastructure Political scientists emphasize honest and democratic government This book argues that three further factors are key paradoxes patterns and portals To an unusual

degree the world's most prosperous economies and societies think and act paradoxically. At their core are enigmatic puzzle-like belief systems that elicit cooperation via abstract patterns rather than personal connections. They are often accompanied by high levels of autodidactic self-directed learning and intense creation in the arts and sciences. These factors when combined facilitate large-scale interactions between strangers and in so doing they energize markets, industries, cities, and publics. Pattern-based political economies are especially prominent in the port cities, regions, and nations that are concentrated along the world's maritime circumference in North America, East Asia, North Western Europe, and Australasia. It is only by integrating additional cognitive, cultural, creative, and geographic elements that we can truly understand the successes of prosperous economies. This book represents a significant contribution to the literature on political economy, economic growth, and prosperity.

The Business of Changing the World Raj Kumar, 2019-04-30. The new world of results-driven aid that could put an end to extreme poverty. Drawing on 2 decades covering global development as editor in chief of Devex, Raj Kumar explores how nontraditional models of philanthropy and aid are empowering the world's poorest people to make progress. Old aid was driven by good intentions and relied on big-budget projects from a few government aid agencies like the World Bank and USAID. Today corporations, Silicon Valley start-ups, and billionaire philanthropists are a disrupting force pushing global aid to be data-driven and results-oriented. This 200-billion industry includes emerging and established foundations like the Chan Zuckerberg Initiative and the Bill and Melinda Gates Foundation. Entrepreneurial startups like Hello Tractor, which offers an Uber-like app for farmers in Nigeria, and Give Directly, whose app allows individuals to send money straight to the phone of someone in need, are also giving rise to this new culture of charity. The result is a more sustainable philosophy of aid that elevates the voices of the world's poor as neighbors, partners, and customers. Refreshing and accessibly written, *The Business of Changing the World* sets forth a bold vision for how we can use our vote, our voice, and our wallet to turn well-intentioned charity into effective advocacy to transform the world for good. Businesspeople, policymakers, entrepreneurs, nonprofit executives, philanthropists, and aid workers around the world will all be influenced by this transformation.
