World Bank Project Completion Report 2007:

Lessons Learned from World Bank Education Management Information System Operations Husein Abdul-Hamid, Namrata Saraogi, Sarah Mintz, 2017-04-13 Lessons Learned from World Bank Education Management Information System Operations provides an overview of the World Bank's portfolio in the area of Education Management Information Systems EMISs over the course of 17 years from 1998 to 2014. It seeks to identify overall trends and characteristics of World Bank support in this area with the intent of informing future project preparation and analytical work. The portfolio review revealed that although several good practices were evident, operational performance of EMIS activities fell short of expectations with widespread deficiencies that ranged from unclear definitions and understanding of the EMIS to ineffective implementation and utilization. Examples of successful activities include the development of an EMIS to manage teachers and provide access to education for example Afghanistan, utilization of an EMIS as a management tool for example Bosnia and Herzegovina, creation of an online EMIS to improve access to education data for example Honduras, use of an EMIS to strengthen teaching and learning for example Guatemala and Lithuania, and use of an EMIS as a management tool for schools for example Malaysia. These success stories highlight how a well implemented EMIS can improve the performance of an education system. The challenges that have been identified as contributing to the shortcomings are related to the following: Misalignment of activities and unrealistic EMIS goals, Institutionalization of the EMIS, Sustainability challenges resulting from inconsistent leadership, Missed integration opportunities, Private players in education EMIS at the local level. Future projects could benefit from the SABER Systems Approach for Better Education Results EMIS Assessment Framework. The SABER EMIS Framework focuses on the need for a strong enabling environment, system soundness, quality data, and effective utilization as the key factors essential for the successful implementation of an EMIS. Initial needs assessment of a country's EMIS can play a critical role in benchmarking countries and provide a valuable foundation for the design of new projects. *GEF Annual Performance Report 2007*, *World Investment Report 2007 Transnational Corporations, Extractive Industries and Development* United Nations, 2008

The World Bank and Transferring Development Adrian Robert Bazbauers, 2017-08-20 This book analyses the World Bank's provision of technical assistance from 1946 to the present day. It argues that the relational dynamics between technical assistance provider and recipient affects the legitimacy of policy norms travelling from the international to the domestic. Beginning from the constructivist position that development is a social construct, the author contends that successful policy movement via technical assistance depends on the recipient's perception of the validity of policy reforms, with perception being influenced by the way those ideas and practices are presented, packaged and transferred. In advancing this argument, Bazbauers analyses four pillars of World Bank technical assistance: technical assistance components, advisory services, incorporated within lending operations, stand alone technical assistance projects, projects designed to solely deliver technical assistance, survey missions, activities involved in measuring

key areas manpower planning state retrenchment market based versus active state and ideas about having a right to a quality education in an era of government accountability While responding to similar policy recommendations these countries have differed in how they have implemented decentralization incorporated private actors allocated authority over curriculum and established instruments of accountability Claudia Diaz Rios traces the legacies of previous education policies and local struggles among stakeholders in reshaping and sometimes rejecting foreign recommendations Translating Global Idea will be an invaluable resource for scholars of comparative politics and the globalization of education particularly those interested in policy development in middle and low income countries as well as practitioners invested in promoting education policy changes in Latin America **GEF Country Portfolio Evaluation: Madagascar (1994-2007) , Hypocrisy Trap**

Politics of Marketising Asia T. Carroll,D. Jarvis,2014-05-29 Economic growth continues to transform the economic and political landscape of Asia Equally the policies now being adopted to promote private sector participation re structure state entities and reduce the presence of the state in the provision of public goods and services are tied to fundamental transformations in Asia s state society relations The global cast of contributors present a timely analysis of the impact of neo liberalism on Asia s developmental policies and the organisation of Asian states and markets Ironically the developmental state that has historically driven Asia s rapid economic transformation is now threatened by an increasingly dominant neoliberal agenda that aims to roll back the state in the name of market fundamentalism Decentralization in Client

Countries ,2008-01-01 Decentralization in Client Countries assesses the effectiveness of Bank support for decentralization between fiscal years 1990 and 2007 in 20 countries seeking to inform the design and implementation of future support Given the difficulties of measuring the results of decentralization the evaluation uses intermediate outcome indicators such as strengthened legal and regulatory frameworks for intergovernmental relations improved administrative capacity and increased accountability of subnational governments and functionaries to higher levels of government and to local citizens to assess the results of Bank support in these 20 cases To examine potential lessons at a sectoral level the evaluation also assesses whether Bank support for decentralization improved intermediate outcomes for service delivery in the education sector in 6 of the 20 countries **Rethinking World Bank Influence** D. Brent Edwards Jr.,2023-04-13 Why is it so hard for

international development organizations even ones as well resourced and influential as the World Bank to generate and sustain change in the way things are done in those countries where they work Despite what in many cases is decades of investment and effort why do partner governments continue to engage in those traditional patterns and styles of public service management that international development organizations have sought to supplant with methods that are supposedly more accountable efficient and effective This book provides an answer to these questions However rather than pathologizing

partner governments as the source of the problem that is rather than maintaining the distinction between doctor international development organizations and patient partner governments wherein the patient is seen as unwilling to take their medicine enacting good governance practices this book instead reframes the relationship The central argument is first that the programs and projects of international organizations are introduced into and are constrained by multiple layers of ritual governance that is performative acts and cultural logics that intersect with and reinforce the political economic and social structures in and through which they operate As is shown the contextual factors that guide governance practices are largely beyond the reach of the international development organizations the relevant logics have their roots in state ideology but also extend back to the colonial logics that continue to operate at the heart of the state apparatus The second the central argument is that international aid organizations and the governments with which they work are engaged in a ritual aid dance where each actor plays a part but does not and cannot acknowledge the ways that it depends on the other for its own gain This relationship can be considered a dance because each participant responds to and needs the other and because both sides do so in ways that are carefully choreographed with the overall trajectory or contours of the dance being more or less known to the participants These arguments are based on research on the World Bank s efforts over the course of several decades to encourage through its financing projects and technical assistance the implementation of social sector reform in Indonesia related to decentralization community participation and school based management
