Choice: The focus on the practicalities of how to do world history probably gives it its edge. Its thirty-three chapters are grouped into sections that address how to set up research projects in world history, how to teach it, how to get jobs in it, how to frame it, and how it is done in various parts of the globe. It is an actual handbook, in other words, as opposed to a sample of exemplary work. English Historical Review *A Companion to World History*

Perspectives, 2007. The Failed Promise of the American High School, 1890-1995 David L. Angus, Jeffrey Mirel, 1999. This provocative new study of the American high school examines the historical debates about curriculum policy and also traces changes in the institution itself as evidenced by what students actually studied. Contrary to conventional accounts, the authors argue that beginning in the 1930s American high schools shifted from institutions primarily concerned with academic and vocational education to institutions mainly focused on custodial care of adolescents. Claiming that these changes reflected educators' racial, class and gender biases, the authors offer original suggestions for policy adjustments that may lead to greater educational equality for our ever growing and ever more diverse population of students.
